Note: Revision of forecast for consolidated financial results in the second quarter: Yes

4. Others

(1) Changes of important subsidiaries in the period (Changes of specific subsidiaries with that of the scope of consolidation): None

(2) Use of simplified accounting methods and accounting methods particular to preparation of the quarterly consolidated financial statements: Yes

Remarks: Refer to page 9 of 4.Others in "Operating Results."

(3) Changes of policy, procedure and indication of accounting in Consolidated Financial Statements.

(Details recorded under the changes in significant information in the preparation of Consolidated Financial Statements.)

1. Changes with revised method of accounting: Yes

2. Changes except No.1: Yes

Remarks: Refer to page 9 of 4.Others in "Operating Results."

(4) Total issued shares (Ordinary shares)

1. Total issued and outstanding at the end of the period (including treasury stocks)

Six months ended September 30, 2008: 1,230,188,073 shares

Year ended March 31, 2008: 1,230,188,073 shares

2. Number of treasury stock at the end of the period

Six months ended September 30, 2008: 2,365,247 shares

Year ended March 31, 2008: 2,181,765 shares

3. Average number of shares during the period (cumulative quarterly period)

Six months ended September 30, 2008: 1,227,922,869 shares

Six months ended September 30, 2007: 1,228,280,366 shares

Note and special instructions for the use of financial forecasts provided in this document

(1) Assumptions for forecasts: Foreign exchange rate (for the third and fourth quarter): ¥100/US\$

Bunker oil price (for the third and fourth quarter): US\$500/MT

The above forecast incorporates certain assumptions the Company regarded as rational expectations at the time this report was announced. Actual results could differ materially from those projected figures. Refer to page 4-8 of the attachment for assumptions and other matters related to the forecast.

(2) Effective from the first quarter of this fiscal year, "Accounting Standard for Quarterly Financial Statements" (ASBJ Statement No.12, March 14, 2007) and "Implementation Guidance on Accounting Standard for Quarterly Financial Statements" (ASBJ Statement Guidance No.14, March 14, 2007) have been adopted. Quarterly financial statements are prepared in accordance with "Rules Concerning Quarterly Financial Statements."

Supplementary Information

Note: Diluted net income per share data for the second quarter is not shown in the above table, as there are no residual shares having possibilities of diluting stock value.

Operating Results

1. Review of Consolidated Operating Results

For the second quarter (July 1, 2008–September 30, 2008), NYK Line posted consolidated revenues of ¥740.2 billion, compared with ¥655.3 billion for the same period last year, operating income of ¥76.6 billion, compared with ¥51.3 billion last year, recurring profit of ¥74.7 billion, compared with ¥48.6 billion last year, and net income for the quarter of ¥46.9 billion, compared with ¥26.3 billion for the same period last year.

Overview

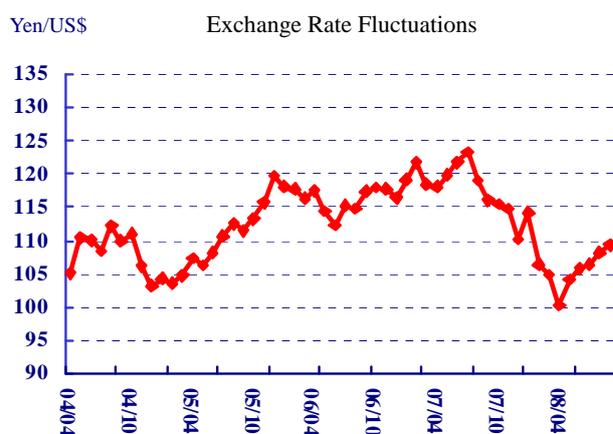

Overall, consolidated revenues for the second quarter (July 1, 2008–September 30, 2008) climbed 13.0% compared to the same period last year, reflecting substantial revenue growth in the shipping segment, composed of liner trade and bulk shipping. This growth was due mainly to the recovery of freight rates for container transport, and to high levels of demand in the market for dry bulk transport, although the market entered a correction phase. Meanwhile, the increase in cost and expenses was limited to 10.4% despite upward pressure from rising bunker oil prices and other factors. As a result, operating income climbed 49.4%, or ¥25.3 billion, from the same period last year, and the ratio of operating income to revenues rose 2.6 percentage points from 7.8% to 10.4%. Recurring profit jumped by 53.5%, or ¥26.0 billion, and net income for the quarter climbed 78.1%, or ¥20.5 billion, compared with the same period of the previous year.

The impact of fluctuations in foreign exchange rates and bunker oil prices on recurring profit for the six-month period under review is summarized in the following table:

	Six months ended September 30, 2008	Six months ended September 30, 2007	Change	Impact
Average exchange rate	¥105.66/US\$	¥119.64/US\$	Yen up ¥13.98	- ¥18.8 billion
Average bunker oil price	US\$593.73/MT	US\$349.89/MT	Price up US\$243.84	- ¥36.5 billion

Notes:

1. A ¥1 change in the exchange rate against the dollar has an annualized impact of around ¥2.7 billion on recurring profit.
2. A US\$1 change per metric ton in the price of bunker oil results in a change in annual recurring profit of approximately ¥300 million.

Period: April 2004–September 2008

Period: April 2004–September 2008

Segment Information

Three Months Ended September 30, 2008 (July 1, 2008 – September 30, 2008)

Liner Trade

Revenues in the liner trade increased over the same period last year due to a recovery of freight rates to a certain degree on North American routes and a year-on-year rise in freight volume amid low transport volumes on container routes overall. However, further increases in bunker oil prices led to a significant decline in performance compared with the same period last year. Meanwhile, we have been trying to cut costs through reductions in fuel consumption and other measures.

Bulk Shipping

Car Carrier Division

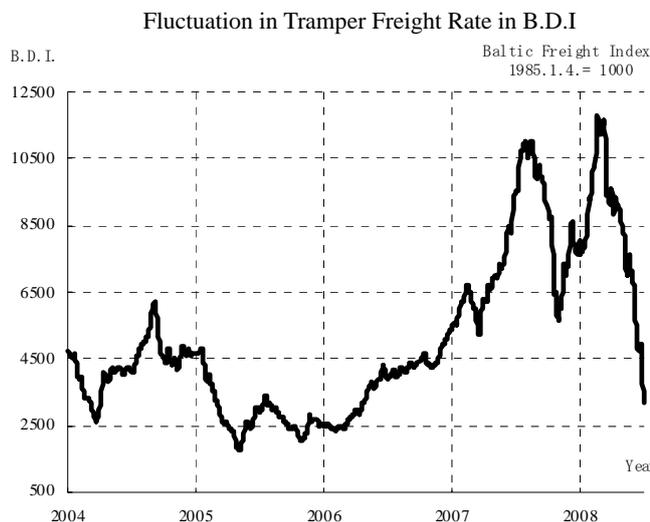

Although levels of U.S.-bound freight were sluggish and levels of Europe-bound freight were somewhat lackluster, the car carrier division enjoyed brisk levels of transport volume bound for emerging nations. With the introduction of seven newly constructed vessels and expanded shipping capacity, the volume of units transported by the division slightly outstripped that for the same period last year.

Dry Bulk Carrier Division

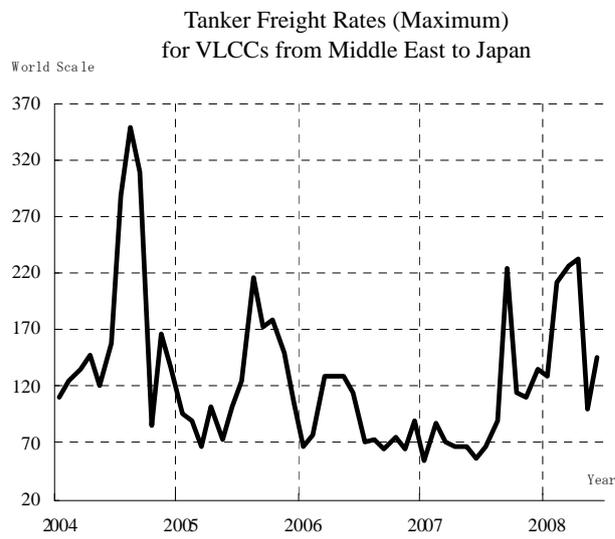

Market conditions were weighed down by factors such as a slowdown in sea transport volumes for iron ores bound for China and the easing of shipping congestion at Australian ports, as well as the summer holiday season and the Beijing Olympic Games, which both arrived in August. September saw the dry bulk market plummet as financial market unrest spread amid a global economic slowdown centered on the United States. However, supported by the successful performance of contracts signed in May and June, during which the market was at historical highs, the division recorded significant growth in revenues and profits for the quarter compared with the same period last year.

Tanker Division

Although the VLCC and Aframax tanker markets were volatile after recording historical highs in July, the market for petroleum product carriers remained strong as the recovery that began in the previous quarter gathered momentum. As a result, the division as a whole outperformed the results it recorded in the same period last year.

Period: April 2004–September 2008

Period: April 2004–September 2008

Logistics

Although the favorable impact of operational improvements are materializing in some areas at NYK Logistics, transport volumes slowed due to the deepening worldwide economic downturn, resulting in a decline in handling volumes. Yusen Air & Sea Service Co., Ltd., was affected by a slowdown in air cargo handling volumes. As a result, the logistics segment as a whole underperformed compared to the same period last year.

Terminal and Harbor Transport

While container handling volumes were unchanged at both domestic and overseas terminals, higher operating costs were not fully absorbed, mainly at overseas terminals, resulting in lower performance compared to the same period last year.

Cruises

Performance was strong in the Japanese market, due in part to the absence of cruise cancellations due to typhoons, and despite a slight decline in the seat load factor compared to the same period last year. In the U.S. market, although the seat load factor remained firm, the division felt the impact of higher costs due to surging bunker oil prices and stronger European currencies. As a result, the cruise segment underperformed compared to the same period last year.

Air Cargo Transportation

Nippon Cargo Airlines Co., Ltd., continued to successfully cut maintenance and aircraft operating costs thanks to the independence it has achieved in terms of aircraft operation, maintenance, and IT, and a fleet composed uniformly of new aircraft. At the same time, the company responded to the cost burden of persistently high fuel oil prices through efforts to reduce fuel consumption. As a result, the air cargo transportation segment achieved a greatly reduced loss compared to the same period last year.

Real Estate and Other Business Services

The real estate business worked mainly to attract new tenants to its office buildings and increase rents from existing tenants, while in other services, the manufacturing and processing business performed favorably and the trading business enjoyed increased sales of bunker oil and ship equipment. As a result, the real estate business and other services segment as a whole achieved growth in both revenues and profits compared to the same period last year.

For consolidated business results for the first three months of the year ending March 31, 2009, please see the first quarter financial results for that period (issued on July 25, 2008).

2. Review of Change in Financial Position

Assets, Liabilities, and Net Assets

Total assets at the end of the second quarter amounted to ¥2,355.5 billion, an increase of ¥69.5 billion from the end of the previous fiscal year. This rise in total assets comes despite a ¥24.0 billion fall in investment securities, due to a decline in share prices, and reflects an increase in current assets of ¥26.0 billion, resulting from an increase in inventories due to surging bunker oil prices, and from an increase in notes and operating accounts receivable-trade in conjunction expansions in the scale of our operations. In addition, noncurrent assets increased ¥43.5 billion due to a ¥22.3 billion increase in construction in progress, mainly attributable to fleet enhancement related investments. Total liabilities grew ¥7.3 billion from the end of the previous fiscal year to ¥1,614.2 billion. This was primarily due to an increase in interest-bearing debt of ¥25.0 billion resulting from increases in long-term loans payable, although the effect of these items was offset somewhat by a reduction in deferred tax liabilities and income taxes payable. Shareholders' equity—the aggregate of shareholders' capital of ¥662.4 billion and valuation and translation adjustments came in at ¥700.1 billion, and adding minority interests of ¥41.1 billion to this resulted in total net assets of ¥741.2 billion. This resulted in a debt-equity ratio of 1.50.

Cash Flows

Net cash provided by operating activities for the second quarter was ¥104.5 billion, mainly due to income before income taxes and minority interests of ¥143.0 billion as well as depreciation and amortization of ¥49.5 billion, which were offset somewhat by ¥60.6 billion in income taxes paid. Net cash provided by investment activities was -¥97.4 billion, primarily reflecting increased expenditure for noncurrent assets, mainly accounted for by investments in vessels. Net cash provided by financing activities was -¥13.4 billion, primarily due to cash dividends paid to shareholders. As a result, the balance of cash and cash equivalents stood at ¥117.1 billion at the end of the second quarter, a rise of ¥1.2 billion, after taking effect of exchange on cash and cash equivalents.

Trends in cash flows over time are illustrated in the following table:

	March 31, 2006	March 31, 2007	March 31, 2008	September 30, 2007	September 30, 2008
1 Shareholders' equity ratio (%)	30.6	30.8	27.9	30.0	29.7
2 Shareholders' equity ratio at market price (%)	46.7	54.4	50.3	59.3	34.8
3 Cash flows vs ratio of interest-bearing debt (years)	5.5	10.3	5.1	-	-
4 Interest coverage ratio	8.5	5.0	8.8	7.2	8.3

1. Shareholders' equity ratio: shareholders' equity/total assets

2. Shareholders' equity ratio at market price: total market capitalization/total assets

3. Cash flows vs ratio of interest-bearing debt (years): interest-bearing debt/cash flow from operating activities

4. Interest coverage ratio: cash flow from operating activities/interest payments

Notes:

1. All indices are calculated using consolidated figures.

2. Cash flow indices are computed using cash flows from operating activities as reported in the consolidated cash flow statements. Interest-bearing debt consists of all interest-bearing liabilities included in liabilities on the balance sheet. Interest payments are based on the interest expenses paid in the consolidated statements of cash flows.

3. Forecast of Consolidated Financial Results

We have adjusted performance forecast for the fiscal year ending March 31, 2009, to revenues of ¥2,750.0 billion, operating income of ¥210.0 billion, recurring profit of ¥210.0 billion, and net income of ¥140.0 billion.

(In billion yen)

Forecast for the fiscal year ending March 2009	Revenues	Operating income	Recurring profit	Net income
Previous	2,730.0	207.0	210.0	140.0
Year ending March 31, 2009	<u>2,750.0</u>	<u>210.0</u>	<u>210.0</u>	<u>140.0</u>
Revisions				
Change	20.0	3.0	-	-
Percentage change	0.7%	1.4%	-	-

Assumptions for forecasts:

Exchange rate: ¥100/US\$ for the third and fourth quarters.

Bunker oil prices: US\$500/metric ton for the third and fourth quarters.

Dry bulk market levels have plummeted since the latter half of the second quarter, and we face concerns of a slowdown in container transport volumes due to the worldwide economic downturn as well as uncertainty regarding the effect of that downturn on non-shipping segments such as logistics and cruises. Meanwhile, bunker oil prices are trending downward and freight rates for containerships have recovered to a certain degree. Given these factors, we expect full-year results to remain mostly unchanged compared to last fiscal year.

4. Others

(1) Changes in important subsidiaries during the period (changes in specific subsidiaries due to changes in the scope of consolidation): None

(2) Use of simplified accounting methods and accounting methods particular to preparation of the quarterly consolidated financial statements

1. Calculation of doubtful accounts of ordinary credits

As there is not recognized any significant difference between the actual default-experience rate calculated as at the end of the second quarter of fiscal 2008 and that calculated as at the end of the previous fiscal year, an uncollectible amount continues to be estimated based on the same default-experience rate as applied for the previous fiscal year.

2. Calculation of taxes, deferred tax assets, and deferred tax liabilities

The Company and some of its subsidiaries have adopted an accounting method that limits deductible and taxable items and tax credit items used in the calculation of the amounts of income and other taxes paid to those that are material.

Because there have been no substantial changes in the business environment and no temporary valuation differences since the end of last fiscal year, the Company is using the earnings forecasts and tax planning from last fiscal year to determine the possibility of deferred tax assets being utilized.

(3) Changes in accounting principles, procedures and presentation methods for quarterly financial statements

1. Accounting standard for quarterly financial statements

Effective from the first quarter of this fiscal year, "Accounting Standard for Quarterly Financial Statements" (ASBJ Statement No.12, March 14, 2007) and "Implementation Guidance on Accounting Standard for Quarterly Financial Statements" (ASBJ Statement Guidance No.14, March 14, 2007) have been adopted. Quarterly financial statements are prepared in accordance with "Rules Concerning Quarterly Financial Statements."

2. Accounting standard for valuation of inventories

Effective from the first quarter of this fiscal year, the Company has adopted the "Accounting Standard for Measurement of Inventories" (ASBJ Statement No. 9, July 5, 2006) and has switched from mainly using the lower-of-cost-or-market method to mainly using the identified-cost method (reducing book value in accordance with declines in profitability). The effect of this change is minimal.

3. Practical solution on unification of accounting policies applied to foreign subsidiaries for consolidated financial statements

Effective from the first quarter of this fiscal year, "Practical Solution on Unification of Accounting Policies Applied to Foreign Subsidiaries for Consolidated Financial Statements" (ASBJ Practical Issues Task Force No.18, May 17, 2006) has been applied, and accordingly made any necessary modifications to its consolidated financial statements. The effect of this change is minimal.

4. Accounting standard for lease transactions

Lessees

Effective from the first quarter of this fiscal year, the Company has early adopted the "Accounting Standard for Lease Transactions" (ASBJ Statement No. 13; June 17, 1993; latest revision March 30, 2007) and the "Guidance on Accounting Standard for Lease Transactions" (ASBJ Statement Guidance No. 16; January 18, 1994; latest revision March 30, 2007). Non-ownership-transfer finance leases will no longer be subject to accounting treatment for operating leases and will instead be treated as ordinary sales transactions, and capitalized as lease assets.

Lease assets arising from non-ownership transfer finance leases are depreciated over a useful life equal to the lease period with an estimated residual value of zero.

The conventional accounting treatment will still apply to non-ownership-transfer finance leases that commenced before the current fiscal year began on April 1, 2008.

The effect of this change is minimal.

5. Change of classification of business segment:

Business segments are categorized primarily based on the type and nature of service and organizational setup. "Travel agency" which has been hitherto included in "Other" segment, is categorized into "Logistics" segment in order to improve consistency with the categories used for business management. The effect on the segment information arising from this change is minimal.

Notes: 1. Change of classification of business segment:

Business segments are categorized primarily based on the type and nature of service and organizational setup. "Travel agency" which has been hitherto included in "Other" segment, is categorized into "Logistics" segment from first quarter of this fiscal year, in order to improve consistency with the categories used for business management. The effect on the segment information arising from this change is minimal.

2. Classification of business segment:

Business segments are categorized primarily based on the type and nature of service and organizational setup as well as by referencing Japan Standard Industrial Classification.

3. Major operation and services in each segment:

Liner Trade Ocean cargo shipping, ship owning and chartering, shipping agency
 Bulk Shipping Ocean/coastal cargo shipping, ship owning and chartering, shipping agency
 Logistics Warehouse operation, cargo transport/handling business
 Terminal and Harbor Transport Container terminals business, harbor transport services, tugboat operation
 Cruise Ownership and operation of passenger boats
 Air Cargo Transportation Air cargo Transport
 Real Estate Rental, management and sale of real estate properties
 Other Wholesaling of ship machinery and furniture, other services related to transport, information-processing business and wholesaling of oil products

4. Common operating expenses are allocated to individual segments.

(6) Notes in the Event of Significant Changes in Shareholders' Capital

The second quarter of this fiscal year (April 1, 2008 – September 30, 2008)

Not applicable
