Note: Revision of forecast for consolidated financial results in the third quarter: Yes

4. Others

(1) Changes of important subsidiaries in the period (Changes of specific subsidiaries with that of the scope of consolidation): None

(2) Use of simplified accounting methods and accounting methods particular to preparation of the quarterly consolidated financial statements: Yes

Remarks: Refer to page 9 of 4.Others in "Operating Results."

(3) Changes of policy, procedure and indication of accounting in Consolidated Financial Statements.

(Details recorded under the changes in significant information in the preparation of Consolidated Financial Statements.)

1. Changes with revised method of accounting: Yes

2. Changes except No.1: Yes

Remarks: Refer to page 9 of 4.Others in "Operating Results."

(4) Total issued shares (Ordinary shares)

1. Total issued and outstanding at the end of the period (including treasury stocks)

Nine months ended December 31, 2008: 1,230,188,073 shares

Year ended March 31, 2008: 1,230,188,073 shares

2. Number of treasury stock at the end of the period

Nine months ended December 31, 2008: 2,341,297 shares

Year ended March 31, 2008: 2,181,765 shares

3. Average number of shares during the period (cumulative quarterly period)

Nine months ended December 31, 2008: 1,227,901,987 shares

Nine months ended December 31, 2007: 1,228,216,481 shares

Note and special instructions for the use of financial forecasts provided in this document

(1) Assumptions for forecasts: Foreign exchange rate (for the fourth quarter): ¥90/US\$

Bunker oil price (for the fourth quarter): US\$300/MT

The above forecast incorporates certain assumptions the Company regarded as rational expectations at the time this report was announced. Actual results could differ materially from those projected figures. Refer to page 4-8 of the attachment for assumptions and other matters related to the forecast.

(2) Effective from the first quarter of this fiscal year, "Accounting Standard for Quarterly Financial Statements" (ASBJ Statement No.12, March 14, 2007) and "Implementation Guidance on Accounting Standard for Quarterly Financial Statements" (ASBJ Statement Guidance No.14, March 14, 2007) have been adopted. Quarterly financial statements are prepared in accordance with "Rules Concerning Quarterly Financial Statements."

Operating Results

1. Review of Consolidated Operating Results

For the third quarter (October 1, 2008–December 31, 2008), NYK Line posted consolidated revenues of ¥611.4 billion, compared with ¥680.7 billion for the same period last year, operating income of ¥36.5 billion, compared with ¥57.9 billion last year, recurring profit of ¥27.2 billion, compared with ¥56.5 billion last year, and net income for the quarter of ¥18.9 billion, compared with ¥38.1 billion for the same period last year.

Overview

Overall consolidated revenues for the third quarter (October 1, 2008–December 31, 2008) were ¥69.2 billion, or 10.2%, lower compared to the same period last year. This mainly reflects a decline in freight rates due to a steep drop in the dry bulk market as well as weakening container transport levels brought on by the global economic downturn and a reduction in volumes handled in the logistics, terminal and harbor transport, and air cargo transportation segments. Costs and expenses were down ¥45.4 billion, or 8.1%, from the same period last year, but considerable decline in revenues and surging bunker oil prices put upward pressure on costs, and as a result, operating income decreased ¥21.3 billion, or 36.9%, from the same period last year, and the ratio of operating income to revenues decreased from 8.5% to 6.0%, a decline of 2.5 percentage points. Non-operating income worsened due to an increase in foreign exchange losses and a decrease in equity in earnings of unconsolidated subsidiaries and affiliates, and as a result, recurring profit decreased ¥29.2 billion, or 51.8%, and net income decreased ¥19.1 billion, 50.3%, compared with the same period of the previous year, both significant declines.

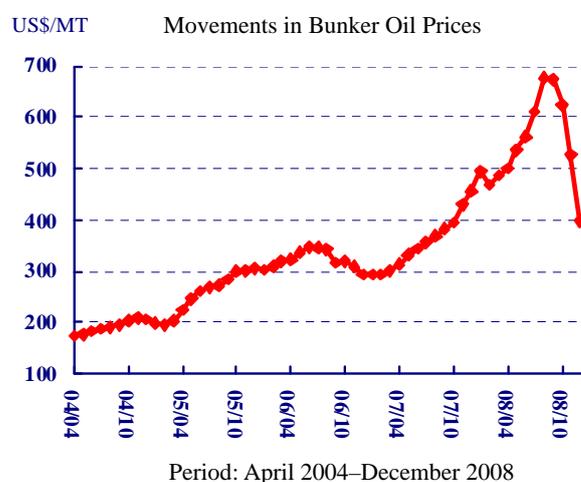

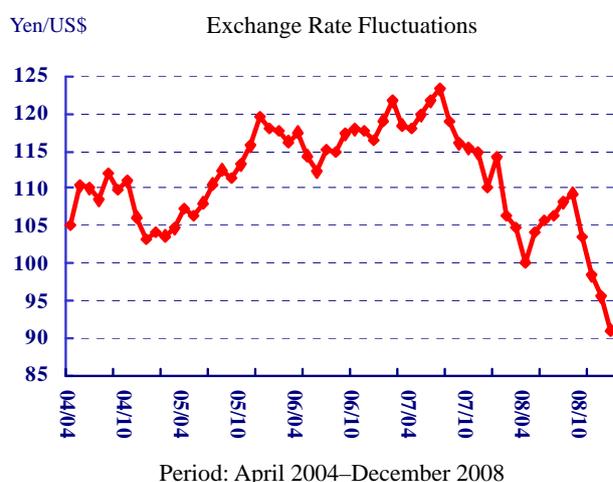

Note: The previous year results and year-on-year comparison are for reference only.

The impact of fluctuations in foreign exchange rates and bunker oil prices on recurring profit for the nine-month period under review is summarized in the following table:

	Nine months ended December 31, 2008	Nine months ended December 31, 2007	Change	Impact
Average exchange rate	¥103.50/US\$	¥117.57/US\$	Yen up ¥14.07	- ¥28.4 billion
Average bunker oil price	US\$567.98/MT	US\$375.81/MT	Price up US\$192.17	- ¥43.2 billion

Notes:

1. A ¥1 change in the exchange rate against the dollar has an annualized impact of around ¥2.7 billion on recurring profit.
2. A US\$1 change per metric ton in the price of bunker oil results in a change in annual recurring profit of approximately ¥300 million.

Note: Exchange rates and bunker oil prices are our corporate values.

Segment Information

Three Months Ended December 31, 2008 (October 1, 2008 – December 31, 2008)

Liner Trade

Liner trade revenues were down substantially. Although freight rates improved on some routes, including North American and Latin American routes, average freight rates dropped substantially mainly on European routes as cargo movement dipped into negative growth and freight volume decreased on container routes overall. Although we worked to reduce fuel consumption and streamline service operations, we were squeezed both revenue- and cost-wise by surging bunker oil prices and the yen's rapid appreciation against other currencies, and consequently the liner trade segment substantially underperformed compared to the same period last year.

Bulk Shipping

Car Carrier Division

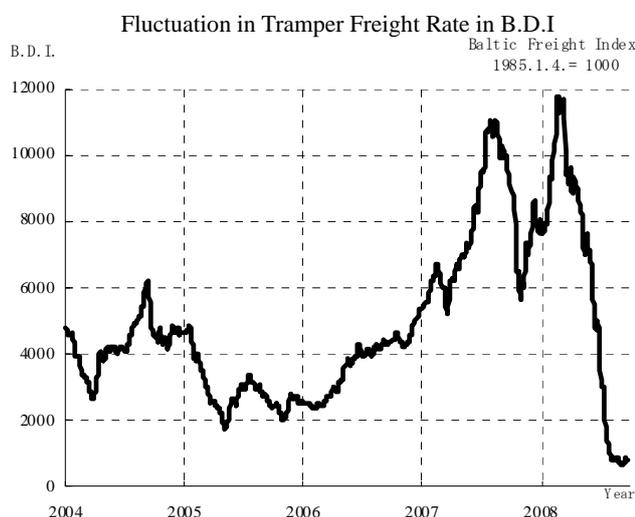

We expanded shipping capacity by adding four newly constructed vessels, but car transport volume remained mostly flat compared to the same period last year as the impact of the financial crisis spread beyond Europe and the U.S. and began affecting levels of transport bound for some emerging countries as well.

Dry Bulk Carrier Division

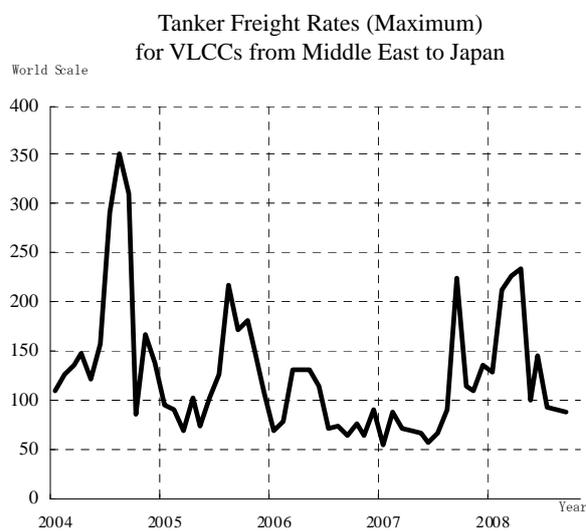

The dry bulk market fell precipitously to historically low levels as markets for commodities such as crude oil retreated rapidly in the face of fears of a global recession. Further, the world's major steel makers and resource companies began to cut production levels as demand for iron ores dropped, which saw sea transport volumes plummet. As a result, the division recorded substantially lower profit compared to the same period last year.

Tanker Division

Although demand for crude oil was clearly slowing and the market for crude oil carriers was soft, the market for petroleum product carriers was stronger compared with the previous fiscal year's levels. As a result, the tanker division as a whole achieved higher revenues and profits compared to the same period last year.

Period: April 2004–December 2008

Period: April 2004–December 2008

Logistics

NYK Logistics experienced an inevitable decline in handling volumes, even during the peak third-quarter season, as the global economic slowdown continued. Yusen Air & Sea Service Co., Ltd. saw the downturn in air cargo handling volumes continue. As a result, the logistics segment as a whole recorded lower revenues and profits compared to the same period last year.

Terminal and Harbor Transport

Lower container handling volume compared with the same period last year at directly operated terminals in Japan and overseas due to an overall downturn in container transport levels resulted in lower revenues and profits compared to the same period last year.

Cruises

In Japan, although the seat-load factor declined, the drop in bunker oil prices resulted in stronger performance compared with the same period last year. In the U.S. market, however, lower revenue due to the impact of the economic slowdown and scheduled dockings resulted in the cruise segment overall underperforming compared to the same period last year.

Air Cargo Transportation

Nippon Cargo Airlines Co., Ltd. saw revenues fall substantially as unit freight rates fell and handling volumes also declined in the wake of a downturn in the air cargo market due to the economic slowdown triggered by the U.S. financial crisis. Although we worked to cut fuel consumption, maintenance and aircraft operating costs, we were unable to absorb the impact of market downturns and recorded a slightly larger loss compared to the same period last year.

Real Estate and Other Business Services

The real estate business worked to increase rental income from existing tenants by raising rates when renewing rental agreements. In other services, the trading business saw revenues decline as prices of bunker oil for ships dropped, but increased fee income due to a rise in volumes handled and sales of ship equipment were favorable. As a result, the real estate business and other services as a whole recorded lower profits compared to the same period last year.

For consolidated business results for the first three months ended June 30, 2008 and the six months ended September 30, 2008, please refer to the first quarter financial results (issued on July 25, 2008) and the second quarter financial results (issued on October 27, 2008).

2. Review of Change in Financial Position

Assets, Liabilities, and Net Assets

Total consolidated assets at the end of the fiscal third quarter totaled ¥2,144.4 billion, a decrease of ¥141.5 billion from the end of the previous fiscal year. This reflects a decrease in current assets of ¥49.2 billion resulting from a decrease in inventories because of a drop in bunker oil prices and a decrease in notes and operating accounts receivable-trade, and a decrease in noncurrent assets of ¥92.2 billion resulting from a ¥114.0 billion decrease in investment securities. Total consolidated liabilities totaled ¥1,524.9 billion, a decrease of ¥81.9 billion from the end of the previous fiscal year. This mainly reflects decreases in notes and operating accounts payable-trade, deferred tax liabilities, and income taxes payable, which offset an increase in interest-bearing debt of ¥30.0 billion resulting from increases in commercial papers. Shareholders' equity—the aggregate of shareholders' capital of ¥665.4 billion and valuation and translation adjustments—totaled ¥579.4 billion, and adding minority interests of ¥40.0 billion to this resulted in total net assets of ¥619.4 billion. As a result, the debt-equity ratio finished at 1.82.

Cash Flows

Net cash provided by operating activities for the third quarter was ¥131.8 billion, mainly due to income before income taxes and minority interests of ¥171.9 billion as well as depreciation and amortization of ¥74.5 billion, which were offset somewhat by ¥91.1 billion in income taxes paid. Net cash provided by investment activities was -¥128.3 billion, primarily reflecting increased expenditure for noncurrent assets, mainly accounted for by investments in vessels. Net cash provided by financing activities was ¥26.5 billion, primarily due to an increase in loans and commercial papers, despite ¥30.6 billion of cash dividends paid to shareholders. As a result, the balance of cash and cash equivalents stood at ¥125.6 billion at the end of the third quarter, a rise of ¥9.6 billion, after taking effect of exchange on cash and cash equivalents.

Trends in cash flows over time are illustrated in the following table:

	March 31, 2005	March 31, 2006	March 31, 2007	March 31, 2008	December 31, 2008
1 Shareholders' equity ratio (%)	29.0	30.6	30.8	27.9	27.0
2 Shareholders' equity ratio at market price (%)	53.4	46.7	54.4	50.3	31.2
3 Cash flows vs ratio of interest-bearing debt (years)	3.6	5.5	10.3	5.1	-
4 Interest coverage ratio	10.4	8.5	5.0	8.8	7.0

1. Shareholders' equity ratio: shareholders' equity/total assets

2. Shareholders' equity ratio at market price: total market capitalization/total assets

3. Cash flows vs ratio of interest-bearing debt (years): interest-bearing debt/cash flow from operating activities

4. Interest coverage ratio: cash flow from operating activities/interest payments

Notes:

1. All indices are calculated using consolidated figures.

2. Cash flow indices are computed using cash flows from operating activities as reported in the consolidated cash flow statements. Interest-bearing debt consists of all interest-bearing liabilities included in liabilities on the balance sheet. Interest payments are based on the interest expenses paid in the consolidated statements of cash flows.

3. Forecast of Consolidated Financial Results

Revision of Earnings Forecasts

We have revised down our performance forecast for the fiscal year ending March 31, 2009, to revenues of ¥2,500.0 billion, operating income of ¥159.0 billion, recurring profit of ¥156.0 billion, and net income of ¥73.0 billion.

(In billion yen)

Forecast for the fiscal year ending March 2009	Revenues	Operating income	Recurring profit	Net income
Previous	2,750.0	210.0	210.0	140.0
Year ending March 31, 2009	<u>2,500.0</u>	<u>159.0</u>	<u>156.0</u>	<u>73.0</u>
Change	-250.0	-51.0	-54.0	-67.0
Percentage change	-9.1%	-24.3%	-25.7%	-47.9%

Assumptions for forecasts:

Foreign exchange rate: ¥90/US\$ for the fourth quarter.

Bunker oil prices: US\$300/metric ton for the fourth quarter.

Bunker oil prices are in decline, but private-sector capital expenditure and personal spending remain in the doldrums due to the deepening financial crisis in Europe and the U.S. and the economic slowdown. We therefore expect transport volumes to drop markedly and freight rates to decline substantially in response. With little prospect for a recovery in demand for iron ores, particularly in China, we expect downturn in the dry bulk market, and non-shipping segments such as logistics and air cargo transportation to be seriously impacted by the slump in electronics and automobile related industries. We also expect the strong yen and other factors to make for a tough fiscal fourth quarter. Given these factors, we have downwardly revised full-year forecasts as detailed above.

Basic Policy on Profit Distribution and Revision of Dividend Forecast

We consider the return of profits to shareholders one of its highest priorities, and sets dividends with due consideration given to its performance outlook, dividend payout ratio, and other factors in accord with a basic policy of maintaining a stable dividend payment. However, the impact of the current unprecedented global recession is now spreading rapidly in the fiscal fourth quarter, and sea transport operators face an extremely challenging business environment. We have revised our earnings forecast accordingly. In light of the revised forecast and our dividend payout ratio, and in the aim of maintaining sufficient internal reserves to withstand market volatility, we revised our year-end dividend forecast, previously issued on October 27, 2008, to ¥2 per share (total annual dividend of ¥15, payout ratio of 25.2%).

(Date of Record)	Dividend per share				
	1 st Quarter	2 nd Quarter	3 rd Quarter	Year-end	Full year
Previous forecast (Oct. 27, 2008)	-	/	-	¥13.00	¥26.00
Revised forecast	-	/	-	¥2.00	¥15.00
Actual result of year ending March 2009	-	¥13.00	-	/	/
(Ref.) Year ended March 2008	-	¥12.00	-	¥12.00	¥24.00

4. Others

(1) Changes in important subsidiaries during the period (changes in specific subsidiaries due to changes in the scope of consolidation): None

(2) Use of simplified accounting methods and accounting methods particular to preparation of the quarterly consolidated financial statements

1. Calculation of doubtful accounts of ordinary credits

As there is not recognized any significant difference between the actual default-experience rate calculated as at the end of the third quarter of fiscal 2008 and that calculated as at the end of the previous fiscal year, an uncollectible amount continues to be estimated based on the same default-experience rate as applied for the previous fiscal year.

2. Calculation of taxes, deferred tax assets, and deferred tax liabilities

The Company and some of its subsidiaries have adopted an accounting method that limits deductible and taxable items and tax credit items used in the calculation of the amounts of income and other taxes paid to those that are material.

Because there have been no substantial changes in the business environment and no temporary valuation differences to affect the judgment of determining the possibility of deferred tax assets being utilized since the end of last fiscal year, the Company is using the earnings forecasts and tax planning from last fiscal year.

(3) Changes in accounting principles, procedures and presentation methods for quarterly financial statements

1. Accounting standard for quarterly financial statements

Effective from the first quarter of this fiscal year, “Accounting Standard for Quarterly Financial Statements” (ASBJ Statement No.12, March 14, 2007) and “Implementation Guidance on Accounting Standard for Quarterly Financial Statements” (ASBJ Statement Guidance No.14, March 14, 2007) have been adopted. Quarterly financial statements are prepared in accordance with “Rules Concerning Quarterly Financial Statements.”

2. Accounting standard for valuation of inventories

Effective from the first quarter of this fiscal year, the Company has adopted the “Accounting Standard for Measurement of Inventories” (ASBJ Statement No. 9, July 5, 2006) and has switched from mainly using the lower-of-cost-or-market method to mainly using the identified-cost method (reducing book value in accordance with declines in profitability). The effect of this change is minimal.

3. Practical solution on unification of accounting policies applied to foreign subsidiaries for consolidated financial statements

Effective from the first quarter of this fiscal year, “Practical Solution on Unification of Accounting Policies Applied to Foreign Subsidiaries for Consolidated Financial Statements” (ASBJ Practical Issues Task Force No.18, May 17, 2006) has been applied, and accordingly made any necessary modifications to its consolidated financial statements. The effect of this change is minimal.

4. Accounting standard for lease transactions

Lessees

Effective from the first quarter of this fiscal year, the Company has early adopted the “Accounting Standard for Lease Transactions” (ASBJ Statement No. 13; June 17, 1993; latest revision March 30, 2007) and the “Guidance on Accounting Standard for Lease Transactions” (ASBJ Statement Guidance No. 16; January 18, 1994; latest revision March 30, 2007). Non-ownership-transfer finance leases will no longer be subject to accounting treatment for operating leases and will instead be treated as ordinary sales transactions, and capitalized as lease assets.

Lease assets arising from non-ownership transfer finance leases are depreciated over a useful life equal to the lease period with an estimated residual value of zero.

The conventional accounting treatment will still apply to non-ownership-transfer finance leases that commenced before the current fiscal year began on April 1, 2008.

The effect of this change is minimal.

5. Change of classification of business segment:

Business segments are categorized primarily based on the type and nature of service and organizational setup. “Travel agency” which has been hitherto included in “Other” segment, is categorized into “Logistics” segment in order to improve consistency with the categories used for business management. The effect on the segment information arising from this change is minimal.

Notes: 1. Change of classification of business segment:

Business segments are categorized primarily based on the type and nature of service and organizational setup. "Travel agency" which has been hitherto included in "Other" segment, is categorized into "Logistics" segment from first quarter of this fiscal year, in order to improve consistency with the categories used for business management. The effect on the segment information arising from this change is minimal.

2. Classification of business segment:

Business segments are categorized primarily based on the type and nature of service and organizational setup as well as by referencing Japan Standard Industrial Classification.

3. Major operation and services in each segment:

Liner Trade Ocean cargo shipping, ship owning and chartering, shipping agency
Bulk Shipping Ocean/coastal cargo shipping, ship owning and chartering, shipping agency
Logistics Warehouse operation, cargo transport/handling business
Terminal and Harbor Transport Container terminals business, harbor transport services, tugboat operation
Cruise Ownership and operation of passenger boats
Air Cargo Transportation Air cargo Transport
Real Estate Rental, management and sale of real estate properties
Other Wholesaling of ship machinery and furniture, other services related to transport, information-processing business and wholesaling of oil products

4. Common operating expenses are allocated to individual segments.

(6) Notes in the Event of Significant Changes in Shareholders' Capital

The third quarter of this fiscal year (April 1, 2008 – December 31, 2008)

Not applicable
