| Average bunker oil prices | US\$341.41/MT | US\$442.49/MT | Price up US\$101.09/MT |

Overview

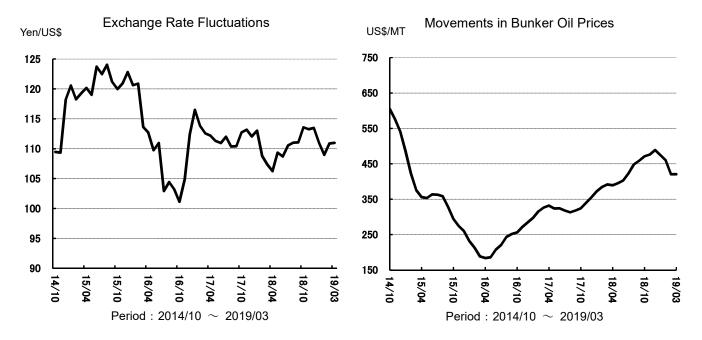

In the container shipping market, the high level of new supply remained ongoing from last year, but spot rates were favorable on the back of strong shipping volumes. In the dry bulk shipping market, the pace of new capacity completion is steadily slowing down, and although shipment volumes of iron ore, coal and grain were firm in the first half, shipping traffic to China was sluggish in the second half, resulting in the market average for the full year being roughly the same as the previous year. In the logistics business, shipment volumes were vigorous, and the business remained strong. On the other hand, crude oil prices were much higher compared to the previous consolidated fiscal year, and bunker prices also increased.

Within this environment, in Bulk Shipping, along with advancing structural reforms in the dry bulk shipping market, profit increased through the accumulation of profit from stable-freight-rate businesses including the LNG and offshore businesses. On the other hand, in the Liner Trade, the new shipping line OCEAN NETWORK EXPRESS PTE. LTD. ("ONE"), which was established with the aim of integrating the container shipping business with those of Kawasaki Kisen Kaisha, Ltd. and Mitsui O.S.K. Lines, Ltd., started offering service from April 1, 2018. However, due to a service disruption that occurred immediately after the start of the business, liftings and slot utilization fell, and although the liftings and slot utilization began to improve from the summer, a loss was recorded. In addition, NYK Line incurred significant one-time costs mainly in the first quarter following the termination of the container shipping business. In the Air Cargo Transportation segment, the company's consolidated subsidiary Nippon Cargo Airlines Co., Ltd. temporarily grounded all 11 of its aircraft from June in order to confirm the soundness of the aircraft. It was decided that the aircraft operated by the company will be limited to the eight Boeing 747-8F type aircraft. At the end of January of this year, the eighth aircraft was returned to service, but a loss was recorded. Also, an extraordinary gain was recorded following the liquidation of assets including the sale of strategic shareholdings and real estate

owned by the company and the sale of business equity as part of the business portfolio revisions. At the same time, an extraordinary loss was recorded for provisions for contract losses regarding the chartering of containerships, as well as an impairment loss and provisions for contract losses following the fundamental revisions in the dry bulk business, as structural reforms that will contribute to strengthening the business structure from next year forward.

As a result, for fiscal year 2018, revenues of ¥1,829.3 billion, operating profit of ¥11.0 billion, recurring loss of ¥2.0 billion and loss attributable to owners of parent of ¥44.5 billion were recorded.

Changes in the average exchange rate between the U.S. dollar and yen as well as the average bunker oil price are shown in the following table.

Note: Exchange rates and bunker oil prices are our internal figures.

(Overview by Business Segment)

(In billion yen)

Liner Trade

In the container shipping division, the newly established shipping line ONE started offering service from April 1, 2018. However, teething problems occurred immediately after the commencement of service in April, resulting in a drop in liftings and slot utilization. The service disruption was resolved in the first quarter, and from July, both liftings and slot utilization greatly improved on the outbound voyages. The higher empty container repositioning costs as a result of the insufficient liftings on the return voyages (North America to Asia and Europe to Asia) placed pressure on the bottom line, but liftings on the return voyages started to recover from the second half. Freight rates were favorable, particularly in the North America trade. Higher bunker prices placed downward pressure on earnings, but synergistic effects of the business integration have emerged steadily as the company continued to work to improve the bottom line by reducing costs.

At NYK Line, higher than expected one-time costs required to terminate the container shipping business occurred mainly in the first quarter, but these costs largely declined from July. The handling volume at container terminals in Japan and overseas increased, and earnings were steady.

As a result of the above, the Liner Trade segment as a whole recorded a loss. Also, revenues greatly declined compared to the previous consolidated fiscal year due to the fact that the revenues of ONE, which is accounted for by the equity method, are no longer included.

Air Cargo Transportation

In the Air Cargo Transportation segment, as a result of the improper maintenance work conducted in the past by the consolidated subsidiary Nippon Cargo Airlines Co., Ltd., a "Business improvement order regarding the securing of air transportation safety" was received on July 20, 2018 from the Minister of Land, Infrastructure, Transport and Tourism. In response to this order, the company submitted improvement measures on August 17. All of the aircraft operated by the company were temporarily grounded from the middle of June in order to confirm the soundness of the aircraft, and it was decided that only the Boeing 747-8F aircraft will continue to be operated. The aircraft were successively returned to service once the soundness was confirmed, and in January of this year, the eighth aircraft was returned to service. Although the volume of cargo transported is gradually recovering, revenues were lower compared to the previous consolidated fiscal year, and a loss was recorded.

Logistics

In the air freight forwarding business, the bottom line significantly improved due in part to the urgent transportation demand for stranded cargo resulting from typhoons in Japan and other factors. In the ocean freight forwarding business, due in part to the last-minute demand from concern over the trade friction between the US and China, shipping volumes were strong particularly in East Asia. In the logistics business, volumes were strong as a result of the robust demand in the US, and volumes were also firm in the Europe. In the coastal transportation business, although the business was affected by typhoons, shipping traffic was firm throughout the year.

As a result of the above, the overall Logistics segment achieved higher profit on higher revenue compared to the previous consolidated fiscal year.

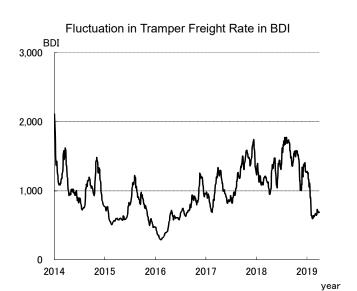

Bulk Shipping

In the automobile transport market, shipping traffic was strong to North America, Europe and within Asia. However, the shipping volumes to resource rich countries remain sluggish, and total finished car shipping volumes declined compared to last year. Under these circumstances, efforts were made to reduce operational costs, such as continuing the slow-steam voyages. In the auto logistics segment, the number of vehicles handled declined due to sluggish finished car markets in some regions, but the company worked to further expand the business, including strengthening the group network and proactively making new logistics proposals.

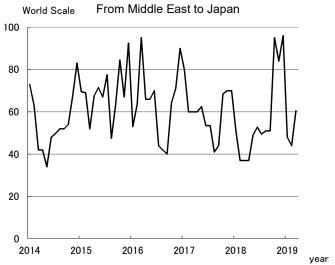

In the dry bulk shipping market, the number of new ships commissioned exceeded the number of ships scrapped, and the excess capacity has not been fundamentally eliminated. Also, cargo volumes of iron ore, coal and grain were firm and the market recovered in the first half, but shipments to China slowed in the second half, and the market deteriorated. Under these circumstances, the NYK Group continued working to secure long-term contracts, as well as to improve the bottom line by reducing costs, such as thoroughly conducting efficient operations, and reducing ballast voyages by finding innovative cargo combinations and ship deployments. In addition, the group moved forward with returning the high cost charted ships early.

In the liquid transport market, for VLCC (very large crude carriers), the supply and demand balance improved as progress was made in scrapping old ships, and the market improved on the back of vigorous winter shipping volumes. For petrochemical tankers, shipping volumes became more active in the second half of the year. For LPG carriers, although there was strong pressure from the completion of new ships, the volume of shipments from the US to Asia increased. LNG carriers were supported by long-term contracts that generate stable earnings, and the bottom line was firm. In the offshore business, FPSO (floating production, storage and offloading) vessels, drill ships and shuttle tankers operated steadily.

As a result of the above, the overall Bulk Shipping segment achieved higher profit on higher revenue compared to the previous consolidated fiscal year.

Tanker Freight Rates (high) for VLCCs

Real Estate and Other Businesses

The Real Estate segment was steady, and both revenues and recurring profit were generally unchanged from the previous consolidated fiscal year.

In the Other Business Services segment, a world cruise was conducted in the cruise business, and the passenger occupancy rate increased. However, in the Other Business Service segment overall, profit was on par with the previous consolidated fiscal year.

(2) Review of Change in Financial Position

The total assets as of March 31, 2019 were ¥2,001.7 billion, a decrease of ¥69.9 billion compared to the end of the previous consolidated fiscal year. Total liabilities decreased by ¥3.4 billion compared to the previous consolidated fiscal year to ¥1,479.9 billion. Under equity, retained earnings decreased by ¥51.6 billion, and shareholders' equity, which is the aggregate of shareholders' capital and total accumulated other comprehensive income, was ¥487.4 billion. This amount combined with non-controlling interests of ¥34.2 billion brought total equity to ¥521.7 billion. As a result of these factors, the debt-to-equity ratio rose to 2.15.

(3) Cash Flows

Cash flow from operating activities as of March 31, 2019 was ¥45.2 billion as a result of the loss before income taxes of ¥21.9 billion, non-cash depreciation and amortization of ¥89.7 billion and interest expenses paid of ¥23.9 billion. Cash flow from investment activities was an outflow of ¥132.2 billion due to the investment in ONE and the acquisition and sale of non-current assets, mainly vessels. Cash flow from financing activities was ¥62.7 billion mainly due to the proceeds from long-term loans payable.

As a result of the above factors, the balance of cash and cash equivalents after taking into consideration the exchange rate differences on March 31, 2019 was ¥78.2 billion, down ¥24.9 billion from the beginning of the fiscal year on April 1, 2018.

(4) Consolidated Earnings Outlook

In the fiscal year ending March 31, 2020, revenues will decrease due to the sale of equity in some businesses following portfolio revisions made during the fourth quarter last year, but the business performance in the Liner Trade and Air Cargo Transportation segment is expected to significantly improve. In the Liner Trade, ONE will recover the liftings and slot utilization lost during the service disruption that occurred immediately after the start of operations in fiscal year 2018, and along with optimizing the cargo composition, the company is expected to become profitable. In the Air Cargo Transportation segment, efforts will be made to increase the utilization of the eight Boeing 747-8F aircraft that have been returned to service and increase the volume of cargo transported by the three aircraft leased out to Atlas. In the dry bulk shipping market, the recently low market is expected to recover from the second quarter, and in the liquid transport market, too, due in part to the impact of the response to the environmental regulations, the market is expected to recover in the second half when the peak demand season begins. Also, in the automobile transport market, measures to improve the bottom line, such as rationalizing ship deployment, will be executed, and in the logistics business, efforts will be made to expand the volume of cargo handled in both the air freight forwarding and ocean freight forwarding businesses.

Based on these expectations, profit is forecast to increase on lower revenue in the following consolidated fiscal year.

(5) Basic Policy Concerning Dividends and Planned Dividend Payments

NYK Line has designated the stable return of profits to shareholders as one of the most important management priorities, and generally targeting a dividend payout ratio of 25%, the profit distribution is decided after comprehensively taking into account the business forecast and other factors. At the same time, based on an ongoing minimum dividend that is not affected by the business results, an annual dividend of ¥20 per share has been set as the minimum dividend for the time being. In accordance with this policy, for the current fiscal year (fiscal year ending March 2019), it is planned to issue a year-end dividend of ¥10 per share for a full-year dividend of ¥20 per share. Regarding next year (fiscal year ending March 2020), too, based on this policy, it is currently planned to issue an interim dividend of ¥20 per share and a year-end dividend of ¥20 for a full-year dividend of ¥40.

2. Basic Approach to Selection of Accounting Standards

We currently apply Japanese generally accepted accounting principles to the consolidated financial statements of the NYK Group. We constantly examine application of the optimal accounting standards with a view toward the future while paying due attention to trends surrounding the various accounting standards available to us for selection.

3. Consolidated Financial Statements

(5) Explanatory Notes to Consolidated Financial Statements

(Notes Regarding Going Concern Assumption)

Not applicable

(Changes in Accounting Policies Due to Revisions of Accounting Standards)

(Application of IFRS 9 Financial Instruments and IFRS 15 Revenue from Contracts with Customers)

At affiliated companies creating the financial statements in accordance with the International Financial Reporting Standards, IFRS 9 Financial Instruments and IFRS 15 Revenue from Contracts with Customers came into effect for fiscal years commencing on or after January 1, 2018, and the relevant accounting standards have been applied from the start of the first quarter consolidated accounting term. The application of these accounting standards will have minimal impact on the consolidated financial statements.

(Application of the Practical Solution on Unification of Accounting Policies Applied to Foreign Subsidiaries, etc. for Consolidated Financial Statements and Related Practical Solution)

PITF No. 18 (September 14, 2018) Practical Solution on Unification of Accounting Policies Applied to Foreign Subsidiaries, etc. for Consolidated Financial Statements, and PITF No. 24 (September 14, 2018) Practical Solution on Unification of Accounting Policies Applied to Associates Accounted for Using the Equity Method have been applied early from the second quarter of the consolidated accounting period. The early application of these Practical Issues Task Forces will have minimal impact on the quarterly consolidated financial statements.

(Changes in Presentation)

(Changes following the application of the Partial Amendments to Accounting Standard for Tax Effect Accounting)

The Partial Amendments to Accounting Standard for Tax Effect Accounting (ASBJ Statement No. 28 issued on February 16, 2018) has been applied from the start of the consolidated fiscal year. Deferred tax assets are indicated in the investments and other assets category, and deferred tax liabilities are indicated in the non-current liabilities category.

(Segment and Other Information)

(Segment Information)

1. Outline of reportable segments

The Company's reportable segments allow financial data to be obtained separately for the NYK Group's business domains. This data is periodically reviewed by the Company's management in order to effectively allocate operational resources and evaluate business performance.

The NYK Group operates comprehensive logistics businesses covering maritime, land, and air transportation on a global scale. These operations are categorized under six reportable segments: Liner Trade, Air Cargo Transportation, Logistics, Bulk Shipping, Real Estate, and Other. The main operations and services of each reportable segment are listed as follows.

| Reportable segment | Major operation and services in each segment: | | | | | | |
|--------------------------|---|--|--|--|--|--|--|
| Liner Trade | Ocean cargo shipping, ship owning and chartering, shipping agency, container | | | | | | |
| | terminals business, harbor transport services, tugboat operation | | | | | | |
| Air Cargo Transportation | Air cargo transport | | | | | | |
| Logistics | Warehouse operation, cargo transport/handling business, coastal cargo shipping | | | | | | |
| Bulk Shipping | Ocean cargo shipping, ship owning and chartering, shipping agency | | | | | | |
| Real Estate | Rental, management and sale of real estate properties | | | | | | |
| Other | Ownership and operation of passenger ships, wholesaling of ship machinery and | | | | | | |
| | furniture, other services related to transport, information- processing business, | | | | | | |
| | wholesaling of oil products, others | | | | | | |

2. Method for calculating revenues, profits and losses, assets, and other financial items of reportable segments

The profits and losses recorded under reportable segments are based on recurring profits or losses. Intra-segment revenues and transfers are primarily based on third-party transaction prices.

3. Information on revenues, profit (loss), assets, and other items by reportable segments

(Note) Details of the amount for adjustments of segment profit (loss) are internal exchanges or transfers to other amounts among segments of ¥59 million and other corporate expenses of -¥7,091 million. We treat general and administrative expenses and non-operating expenses that do not belong to any single segment as other corporate expenses. Also, as a result of revising the business management method for the reportable segments from the start of the first quarter consolidated accounting term, there was a change to the interest burden of each segment. This revision has a minimal impact on segment profit or loss, and it has no impact

on the revenues of each segment, consolidated revenue and consolidated recurring loss. Details of the amount for adjustments of segment assets are receivables or assets related to internal exchange among segments of -\frac{233,591}{233,591} million and corporate assets of \frac{13,061}{233,061} million. Corporate assets are mainly surplus funds invested in cash and deposits.

[Information regarding Impairment Losses on Non-current Assets by Reportable Segment]

Year ended March 31, 2018 (April 1, 2017 – March 31, 2018)

Excluding the extraordinary loss recorded for the losses related to the business reorganization, there were no impairment losses for the important non-current assets.

Year ended March 31, 2019 (April 1, 2018 – March 31, 2019)
