(Attachment) Ocean Network Express Financial Results for FY2019 Full-year

<Full-year Review>

Revenues

Decreased due to sales of subsidiary shares as a part of business portfolio revision

Recurring profit/losss

Returned to profit and improved significantly (+JPY46.5 billion)

≻ Liner

Profits increased significantly due to the recovery by ONE

Air Cargo

Own aircraft utilized as expected. Limited improvement vs. previous year due to slow cargo demand mainly as a result of the US-China trade friction.

➤ Logistics

Both ocean and air freight forwarding volume decreased and profits decreased.

Bulk Shipping

Profits increased vs. previous year. Car Carrier and Energy performed strongly. Dry Bulk

hedged the downward turn of the market through Forward Freight Agreements (FFA).

Extraordinary income/loss

Extraordinary losses recorded due to impairment losses on aircraft, etc., early termination of costly Dry Bulk chartered-in vessels (Total of JPY39.4 billion for FY2019).

On the other hand, extraordinary income was reported due to the disposal of strategic shareholding and real estate (Total of JPY37.4 billion for FY2019).

Dividend

Year-end dividend of JPY20/share is planned. (Full-year dividend of JPY40/share including interim dividend of JPY20/share)

Results

Revenues decreased and profits increased vs. the same period last year.

Comparison by Industrial SEGs

- Profits increased significantly due to the recovery of Liners and the improvement in Bulk Shipping.
- Air Cargo failed to improve significantly. Profits decreased due to the decline in Logistics.

1. Analysis of Change in Recurring Profit between FY Ending Mar. 2019 and FY Ending Mar. 2020

Results

2. Forecast for FY Ending March 2021

➢ Reponses to COVID-19

<Basic Stance>

- We will fulfill our social mission of keeping logistics moving amid the growing effects of COVID-19 around the world.
- To overcome these difficult circumstances together with our customers and business partners, the NYK Group will take measures required to continue stable business operations by prioritizing the safety of all employees engaged in the ocean, land, and air businesses of the NYK Group.

<Emergency Measures>

- Ensuring the safety of the employees
 - Head office and branch offices: Introducing remote work.
 - Onsite: Thorough implementation of measures to prevent the spread of the infection
- Maintaining the business continuity framework including safe operations and measures to maintain operations (Such as ensuring crew changes, etc.)
- Securing long-term funds and a borrowing facility

<Assumptions: Taking into consideration the impact of COVID-19>

- We are assuming that April to June 2020 will be the worst period and that economic activities will subsequently pick up at a moderate pace.
- However, when the time comes, we believe that the world will not be "post-corona" but "co-existing with corona."
- Each industrial segment will weigh in the factors that can be considered at the present time.

<Outlook for FY ending March 2021>

- Decrease in revenues and profits vs. the previous year
- Recurring profit/loss is expected to be +0 for the year (-JPY44.4 billion vs. previous year)
 - The impact of COVID-19 will be immense, and it is believed to be around –JPY50.0 billion to –JPY60.0 billion
- Dividend JPY20/share for the year is planned. We expect to forego paying interim dividends.

Capital Policies and Financial Plans

- There will be no problems in financing for the time being
- Financing (Cash flows from financing activities)
 - Plans to borrow approx. JPY120.0 billion in long-term funds will be moved up, which will mostly cover the scheduled redemptions for FY2020.
 - A commitment credit lines over several years will be secured (Unused portion as of March 31, 2020: Approx. JPY230.0 billion)
- Investment policy (Cash flows from investing activities)
 - Priority on securing free cash flows
 - Even stricter selectivity in choosing new investment projects
 - Continuation and promotion of liquidation of assets (Strategic shareholding / real estate)
- Dividend policy
 - Returning profits to shareholders will be considered one of the most important management issues, and dividends will be paid based mainly on a consolidated payout ratio of 25%
 - Annual dividends of JPY20/share will be set as the minimum level for the time being

Fixed investments to vessel etc	
During Lehman Crisis (FY ending Mar 2009)	Approx. JPY 1.13 trillion
Currently (FY ending Mar 2020)	Approx. JPY 0.23 trillion

Medium- to Long-term Measures

- The basic policy of the Medium-term Management Plan will remain unchanged. However, a review of the quantitative targets and the progress status is scheduled.
- ESG management will be promoted as a long-term growth strategy. However, measures will be taken to address the effects of the current COVID-19 crisis and the changes in the business environment and trade structure of post-COVID-19.
 - Medium-term Management Plan (Staying Ahead 2022 with Digitalization and Green)
 - Basic policy remains unchanged. We will continue to address management issues and the following measures of the plan.
 - Step 1: Optimize business portfolio
 - Decisively reform the dry bulk business (Page.17)
 - Lead the new container business JV (ONE) to success (Page.29~37)
 - Step 2: Secure stable freight-rate business
 - Reinforce LNG and offshore businesses (Page.18)
 - Step 3: Increase efficiency and create new values
 - Implement Digitalization and Green initiatives (Page.19~20)
 - Continue to promote asset liquidation
 - Reduce strategic shareholdings and review real estate holdings
 - Long-term growth strategy
 - Promotion of ESG management

Situation for FY Ending Mar. 2021 by Industrial Segments (Global Logistics)

[Liner]

- Effects of reduced demand due to shrinking economic activities mainly in the European/US trades (more than 20%). The worst will be in the Q1, and subsequently will gradually improve but the reduction in global container demand is expected to exceed 10% compared to the previous year.
- In addition to ongoing tonnage adjustments and the reduction of fixed costs, deep-dive cost controls will be implemented.
 Reduction of facilities will also be carried out, as necessary.
- Amid the effects of reduced demand in the container transportation, the terminal business both in Japan and overseas will continue its ongoing initiatives of improving productivity and operational efficiency.

[Logistics]

- While both the Ocean Freight Forwarding and the Logistics businesses will be largely impacted by reduced demand due to shrinking economic activities, the Air Freight Forwarding business will operate under a different supply and demand environment due to major reductions in international passenger flights.
- We will evolve into a strategic partner, closely aligned with our customers and providing new value, while promoting the enhancement of business efficiency and proactively improving the regional business portfolio and organization.

[Air Cargo]

- As sluggish demand continues from the previous year, due to the gradual reduction of international passenger flights as a result of the impact of the COVID-19 pandemic, drastic changes in supply and demand will occur.
- Responses to emergency demand including cargos containing medical supplies using charter flights, among others, will be implemented.
- Also in response to the effects of COVID-19, large cargo flights, which have large social missions to fulfill, will be leveraged to provide safe operations and stable services.

Situation for FY Ending Mar. 2021 by Industrial Segments (Bulk Shipping)

[Car Carrier]

- Demand plummeted from the beginning of the fiscal year due to the spread of COVID-19. The Q1 is thought to be the worst and the volume of vehicles will decline around 50% vs. the same period last year. Although it will vary by region, gradual recovery is expected, but on full-year basis, we expect a fall in profit. The auto logistics business will also be impacted by the decline in demand.
- Operations that gives due consideration to voiding sailings and cost reductions will be carried out by carefully gauging the trends of the automobile industry and the resumption of economic activities. Selling and scrapping vessels are also possible. Flexible business operations will be promoted anticipating the changes in society and lifestyles post-COVID-19.

[Dry Bulk]

- Market conditions for the time being will be at historic lows, which will put major pressure on the P/L of dry bulkers, which are exposed to the market. Shipments have not necessarily declined compared to the previous year, and the impact of COVID-19 on market sentiment can clearly be seen.
- As economic activity around the world gradually resumes, the market is expected to recover in and after the Q2, in conjunction with the recovery in major cargo movement. However, it will not be enough to compensate for the current deterioration of P/L and a major decrease in profits is expected for the year.
- Streamlining of the fleet and efficient fleet allocation will continue to be promoted, while efforts will be made to improve the profitability by fixing it through timely Forward Freight Agreements.

[Energy]

- The impact of COVID-19 will be limited as most contracts are long-term, stable contracts. We expect continuous and stable profitability.
- □ Efforts will be made to consistently provide safe operations and transport infrastructure.
- Amid the volatile market conditions due to the sharp drop in crude oil prices, ongoing efforts will continue to increase long-term, stable contracts and to mitigate the effects of fluctuating market conditions.

Situation for FY Ending Mar. 2021 by Industrial Segments (Real Estate and Other Businesses)

[Real Estate and Other Businesses]

- □ (Real estate): There have been no adverse effects of COVID-19 for the time being, and no major changes are expected going forward.
- □ (Cruise Ships): Currently, all cruises with return dates up to the late August have been canceled. If the effects of COVID-19 continue, its impact on business performance could became greater.

Progress of Medium-term Management Plan Step 1: Decisively reform dry-bulk business to withstand volatile market conditions

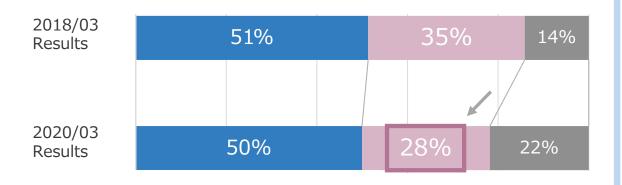

Early redelivery (Result)
 2 vessels in FY2019.
 Plan for further execution. To continue with the effort.
 Securing medium- to long-term contracts (Result)
 Contract 15% increase

Vessel **22%** increase

Volume **10%** increase

- Comparisons between the numbers as of 2018/03 and 2020/03 on a consolidated basis
- The net number of expired and newly contracted projects after the end of the March in 2018(incl. non-delivered vessels)
- Figures refer to CVC and COA contracts with more than two years
- Consolidated basis

- Reforming our fleet portfolio to withstand volatile market conditions
 - Early redelivery and medium- to long-term contracts contribute to the decrease in exposure fleet rate to 28%

Medium/long-term vessels · Medium/long-term cargo contracts

- Medium/long-term vessels · Short-term cargo contracts
- Short-term vessels · Short-term cargo contracts
- Medium/long-term: More than 2 years
- Short-term: Less than 2 years
- $\succ\,$ Percentage on the graph indicates approximate figure.
- > Figure in total may not be 100% due to the effect of figures after the decimal point.

Progress of Medium-term Management Plan Step 2: Secure stable-freight-rate business (enhance investment)

KLINE

Progress of Medium-Term Management Plan Step 3: Increase efficiency and create new values with digitalization

- Promote initiatives to increase efficiency and create new values with digitalization in accordance with the Medium-term Management Plan.
- Even after the new coronavirus pandemic subsides, there's going to be a certain level of impact on society, people's lifestyle, and global structure.
- Under a situation where the coronavirus continues to exist, further accelerate digital transformation to realize agile and resilient service and organization.

> Major initiatives to realize agile and resilient service and organization

[Provide Digital on-board Support]

Better abnormality detection, status diagnosis, remote monitoring through vessel IoT data! Start trial of MarCoPay (on-board electronic currency). Contribute to reducing risk of currency delivery. Develop, start own e-learning platform for crew training. Remote learning prior to getting on-board!

[Establish Better Quality Telework Environment]

- Accelerate introduction of cloud-based applications
 - Promote introduction of business process automation tools

[Nurture Problem-solving Leaders]

Establish in-house digital academy for nurturing digital native leaders

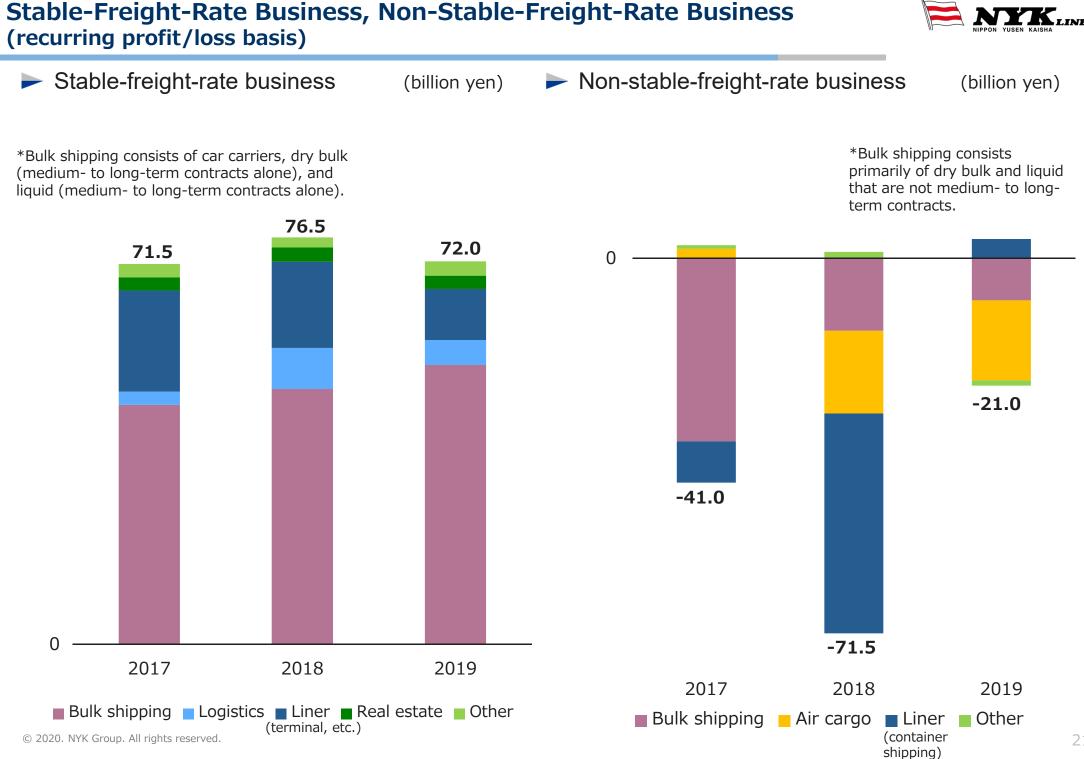

[Continue R&D activities together with partner companies]

- Conduct successful automatic navigation trials, formulate autonomous ships development framework, speed up development further.
 - Develop, with Dualog, a vessel cyber risk management system required for IoT, automation, autonomous ship
 - Continue, accelerate ongoing initiatives with NTT, Toyoko, etc. even under coronavirus crisis

Progress of Medium-Term Management Plan Step 3: Long-term Growth Strategy – Concrete Commercialization of Green Business

Accelerated expansion of business opportunities - Gather information employing intelligence - Build structure	Sale of LNG Fu	System
- Build structure enabling prompt actions	Zero Emission	 Nurture business from a long-term perspective Make it into one of the core businesses of NYK Embody ESG management
	2019 pt. established May 2020 Recognition of current situation an	2030 2050
 ✓ 13 months since the establishment of the dediconsideration, both large and small, <i>increas</i> ✓ Consider flexible investment in the next 10 year ✓ Several billions of yen in recurring procession 	cated dept. the number of projects under Sed to double digits ars (approx. several tens of billions of yen)	"There has been no formidable player in the green business industry" Leverage the <u>unique strength</u> of NYK Group, become a partner chosen for joint research and exploration
Business environment recognition	NYK's current status	Strengths, features of NYK, future approaches
-Switch to LNG fuel gathering pace (Orders for newly built LNG fuel tankers increased)	 Already marketing in Europe; favorable for NYK given its track record Plan to start business in Japan this year (Chubu area, from 2020) 	 Strengths in usage and transport of LNG, which NYK nurtured through ship management and operating LNG carriers on its own, and many years of marketing activities A number of dedicated employees in Japan and abroad (experience in Europe applied in Japan)
 The first project in Japan to take shape in a few years; multiple projects to start every year after that Blessed with the right spot in the ocean, laws have been developed in Japan with active government support 	 MOU for jointly owning and operating offshore wind installation vessels signed with Van Oord of the Netherlands (2019) MOU for crew transfer vessel business signed with NOG of Sweden (2019) 	 -NYK's long established track record in safe marine transportation, trust, and confidence form the platform for discussions of new businesses with partners -Compatibility of high technological prowess with existing offshore business -Leverage the strong connections with Japanese power companies established through existing businesses across various scenarios
-Unprecedented strong trend of zero emission and decarbonizing -Technology for global commercialization is in the development phase (more to come before commercialization)	 International R&D competition for gaining the hegemony in zero emission. NYK has been active by participating in the Advanced Hydrogen Energy Chain Association for Technology Development and Green Ammonia Consortium 	 Accumulation of marine transportation knowhow enables to visualize the factors essential in realizing engine development and zero emission fuel supply The 4 labs of the Group possess technological prowess essential for start-up-type business development Collaborate with involved government agencies and prominent partners in Japan and abroad

Annual bunker consumption 4.2 million MT

Outline

- FY2019 Full-Year: Recorded US\$105 million profit. FY2019 action plans achieved targets (Details:Slide2)
- Synergy Effect: (US\$1,050 million against FY2015) Achieved one-year in advance (Details:Slide3)
- COVID-19 Impact: Liftings stagnated and extra variable cost incurred, however suppressed fixed cost, and achieved results that are not worse than previously forecasted. (Details: Slide4)
- Liftings, Utilization rate, Imbalance improved, spot market rate was stable, and adoption to MARPOL2020 regulations was smooth. (Details: Slide5)

2.FY2019 Full-Year Results Analysis (vs. Previous Year Results)

Total target of US\$500 million per annum improvement action plans are achieved as planned.

- □ **Freight**: Freight increase including effect of cargo portfolio improvement
- □ Variable Cost: Yield Management reinforcement, cost saving effect etc.
- □ **Liftings**: Mainly effects from utilization rate improvement, reinforcement of non-dominant leg.
- Operation cost: Per unit cost decreased as a result of FY2019 product effect, bunker consumption saving initiatives and so on. On the other hand, cost increased because of service expansion (such as West Asian service and Africa service). Net total fixed cost almost as same amount as last year.
- Bunker Price: Increase due to MARPOL 2020 adoption and bunker market fall offset each other, resulting in almost same unit price as last year.
- Overhead cost: Decreased as a result of organization optimization.
- □ **IFRS impact**: IFRS accounting adoption from FY2019.
- Others: Increase in Freight Tax due to revenue increase, and so on

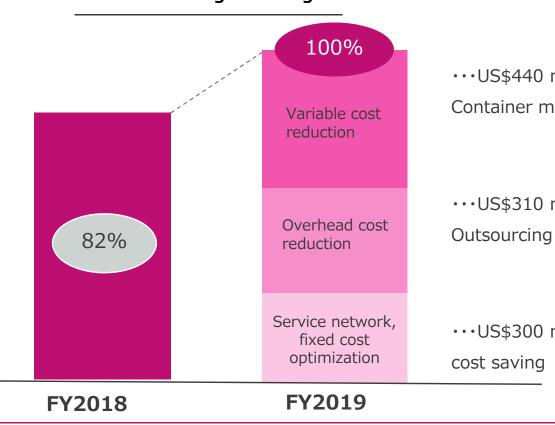

^{© 2020} Ocean Network Express Pte. Ltd.

3.Summary of Synergy Effects

- □ Against the three-year target of synergy effects amounting US\$1,050 million per annum against FY2015 level of the three parent companies before the integration, 82% was realized in the first operating year in FY2018.
- □ At the beginning of FY2019, further 14% achievement to reach 96% was forecasted, however as a result of expedited decision-making speed and strengthened bargaining power, 100% actualized a year ahead in FY2019.
- □ From FY2020 onward, ONE will continue to explore further competitiveness beyond the frame of synergy effects.

Achievement against target

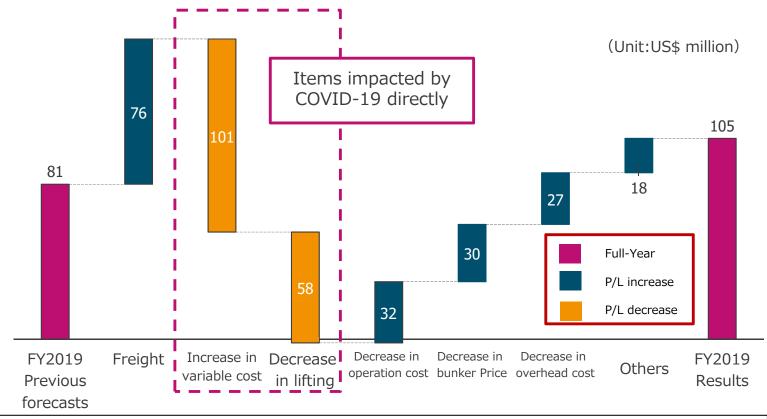

····US\$440 million: Inland cost, terminal procurement, Container maintenance, repair cost and so on.

••••US\$310 million: IT Synergy, Organization optimization, Outsourcing and so on.

••••US\$300 million: Service network optimization, bunker cost saving

4.FY2019 Full-Year Results Analysis (vs. Previous forecasts)

COVID-19 impacted liftings more than previously forecasted after lunar new year. As epidemic spread globally, berth waiting by quarantine reinforcement or operation delay due to shortage of container yard were seen occasionally. Crisis Management Committee was set up in later January headed by CEO, and Business Continuity Plan (BCP) was activated country by country to maintain essential customer service, ship operation, container flow and so on. Extra void sailings were executed to meet decelerating cargo demand. MARPOL2020 regulation came into effect from beginning of this year and ONE Bunker Surcharge (OBS) implementation progressed steadily as planned. Bunker price decrease preceded OBS decrease, on the other hand short term freight rate market was relatively steady, and results ended with an upturn from previous forecasts. Freight : Short term market level after lunar new year was higher than previously forecasted.

- Variable Cost: Effects of COVID-19 such as tighter container storage places and so on (Transitory factor)
- □ Liftings: Due to COVID-19 impact, result was lower than previously forecasted.
- Operation cost: Executed additional void sailings to cope with lower demand after lunar new year.
- Bunker Price: Lower than
 previously forecasted.
- Overhead cost: Agency cost and IT system cost were less than forecasted.
- Others: Impact from exchange rates, IFRS, Freight Tax and so on.

5. Liftings, Utilization Rate, Freight Index of Major trades

(Unit: 1,000TEU)

		FY2018				FY2019			
Liftings / Utilization by Trades		Full Year	1Q	2Q	1H	3Q	4Q	2H	Full Year
		Results	Results	Results	Results	Results	Results	Results	Results
Asia - North America	Lifting	2,664	669	773	1,442	665	585	1,250	2,692

(Unit: 100 = average freight rates as of FY2018 1Q)

	FY2018				FY2019			
Freight Index by Trades	Full Year	1Q	2Q	1H	3Q	4Q	2H	Full Year
	Results	Results	Results	Results	Results	Results	Results	Results
Asia - North America	104	103	105	104	104	110	107	105
Eastbound	104	105	105	104	104	110	107	105
Asia - Europe	104	100	101	100	98	111	105	102
Westbound	104	100	101	100	90		105	102

(Vs. FY2018) Action plans for P/L improvement emerged. Utilization rates improved, non-dominant leg liftings increased, and trade imbalance became less.

(4th Quarter) Freight index increased as a result of MARPOL2020 adoption. COVID-19 impacted is till limited.

 $[\]ensuremath{\textcircled{}^\circ}$ 2020 Ocean Network Express Pte. Ltd.

Impact of COVID-19

Global economy is rapidly deteriorating due to epidemic expansion, which is seriously impacting global supply chain. Demand is declining in large consumption regions such as Europe, North America, and many other locations, and we have executed considerable scale of void sailings in April. Uncertainties are still increasing for the situation after May.

Disclosure of FY2020 Full-year forecasts

Situation is changing dynamically and rapidly, and forecasting FY2020 performance reasonably is difficult under current external circumstances and therefore FY2020 full-year forecasts are not yet fixed.

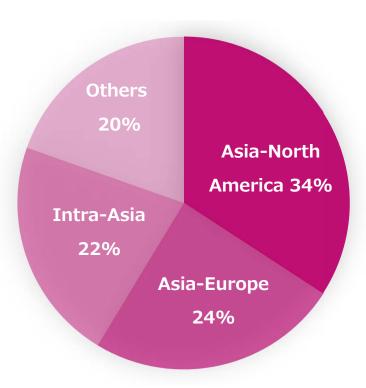

Reference

	FY2019 Action Plans	Target as of beginning of the fisical year (Achieved)						
Cargo Portfolio Optimization, Reinforcement of Yield Management	Cargo portfolio optimization such as inland cargo match back ratio improvement, reinforcement of yield management through improvement of cargo operation efficiency or business process optimization.	US\$190 million per annum						
Products (Service routes, Allocated vessels) Rationalization	Based on operating results of FY2018 as first year of ONE, service network optimization was progressed such as capacity upsize and allocation optimization by pendulum service connecting Europe and US via Asia, launch of in-house feeder services which reduced unit price of fixed cost. Cost saving from bunker cost reduction initiatives are also included here.	US\$260 million per annum						
Organization Optimization	Reduction of overhead cost such as agency cost or IT system usage cost. Initiatives of E-Commerce enhancement, expansion of live chat, introduction of robotics, targeting improvement of customer experience and internal efficiency, have progressed.	US\$50 million per annum						
	KEY TOPICS							
MARPOL2020	Effective January 2020, regulation was implemented to limit sulphur content in bunker oil to be 0.5% or less (MARPOL2020). Switching to compliant bunker was smoothly completed. Attention of customers towards environmental issues are high and cost recovery by implementation of bunker surcharge such as OBS was achieved as planned. Retro-fitting of scrubbers is scheduled mainly for core large ships and in future we continue studying best mix of procurement of compliant oil and scrubber retro-fitting.							
Actualizing Synergy Effects								
Transfer of Overseas Terminal	Transfer of Overseas Examination for transferring overseas terminal business from each of 3 parent companies to ONE is on
