1. Progress of Medium-Term Management Plan:

Summary

Progress of Medium-Term Management Plan

Strategical Progress in FY 2023 and FY 2024

Advancement of Existing Core Business	<ul style="list-style-type: none">✓ Expansion of LNG carrier fleet by signing of new charter contracts and delivery of new vessels (Long-term charter contracts with JERA/SINOPEC, deliveries of new vessels for QatarEnergy/Kyushu Electric Power Co., Inc subsidiary/EDF etc.)✓ Acquisition of multiple segments of ENEOS Ocean's shipping business✓ Expansion of logistics business by M&A and new investment by Yusen Logistics
New Growth Business	<ul style="list-style-type: none">✓ Completion of world's first commercial-use ammonia-fueled vessel✓ Measures for establishment of ammonia supply chain✓ Progress in liquefied CO2 transportation technology, and establishment of production system✓ Completion of crew transport vessels for offshore wind farms, and establishment of comprehensive training center for offshore wind power generation✓ Investment in Northern Offshore Group AB to strengthen offshore wind collaboration
CX/DX/EX Support Strategy	<ul style="list-style-type: none">✓ CX Story : From "A Japanese Company Operating Globally" to "A Global Company Headquartered in Japan"✓ EX : Released "NYK Group Decarbonization Story" in November 2023, and issued Progress Report as a follow up every year/Issued "NYK Group TNFD Report 2024 — A Passion for Planetary Wellbeing" in March 2024✓ DX : Developing 3D models and drawings in shipbuilding, transmission of operational IoT data from ships to shore, and implementing the satellite communication service for exchanging and utilizing data on ships and land

Progress of Medium-Term Management Plan

Business performance

- Full-year results for FY2024 significantly exceeded the plan with recurring profit reaching **JPY490.8 billion**. The results were achieved primarily because freight rates of the container shipping rose due to tight supply and demand situation caused by the situation in the Red Sea, and other businesses remained firm.
- Operating results for FY2025 are expected to decrease YoY due to a pause in the surge of container shipping freight rates; nevertheless, recurring profit is forecasted to be **JPY255.0 billion** by building up stable profits.
- Going forward, despite increasing uncertainties in the near term arising from the impact of tariff policies and other factors, we have projected to earn **recurring profit of JPY440.0 billion and net income of JPY400.0 billion in FY2030** by steadily expanding our earnings base.

Cash flows

- Building on the steady progress of investments, we **have increased** the total planned investment over the four-year period from the initially planned JPY1.2 trillion **to JPY1.4 trillion** by capturing additional growth opportunities.
- Driven by stronger-than-expected earnings, operating cash flow for the four-year period from FY2023 to FY2026 is now expected to total **approximately JPY1.6 trillion**, significantly exceeding the initial forecast of JPY820.0 billion.
- Management-directed allocation generated by improved operating cash flow since release of the plan has been allocated to additional share repurchase (+JPY280.0 billion), dividend (+JPY180.0 billion) and investment (+JPY200.0 billion). Additionally, un-allocated JPY 200 billion has been secured under the most recent forecast.

Shareholder Return Policy

- ❑ Shareholder returns have been expanded, driven by stronger-than-expected operating results and cash flows. For FY2023 and FY2024, we increased the scale of share repurchase from the initial plan of JPY200.0 billion to JPY330.0 billion, while maintaining a payout ratio of 30% (total dividend amount: JPY210.0 billion).
- ❑ The dividend policy for FY2025 and beyond will be as follows:
 - **Payout ratio: To be raised from 30% to 40%**
 - **Minimum dividend per share: To be raised from ¥100 to ¥200**

Despite anticipating a YoY decrease in profits for FY2025, we will increase the payout ratio to enhance shareholder returns. Furthermore, even with the increasing uncertainty in the external environment, the target profits for each business have risen since the formulation of the medium-term management plan, and growth is expected to continue. Therefore, we will raise the minimum dividend payout to enhance the predictability of dividends.

- ❑ Shareholder returns will be further expanded to control equity capital with the aim of improving ROE. **A maximum limit of JPY150.0 billion has been set for share repurchase through the end of April 2026.**

The share repurchase totaling JPY480.0 billion results in a reduction of the outstanding shares by approximately 20%, leading to a permanent increase in both EPS and BPS.

Latest Financial Plan Outlook

- The business results are expected to remain strong toward achieving the outlook for FY2026 presented in the medium-term management plan. Furthermore, the outlook for FY2030 anticipates further buildup of profits beyond the initial forecast, driven by the results of growth investments.

Initial Medium-Term Management Plan		
	FY2026	FY2030
Recurring Profit	JPY270 billion	JPY340 billion
Others	JPY150 billion	JPY160 billion
ONE (our estimate)	JPY120 billion	JPY180 billion
Net Income	JPY240 billion	JPY310 billion
Shareholders' Equity Ratio	57%	Around 57%
After changing to on-balance sheet	49%	Around 50%
ROIC	6.5% (target: over 6.5%)	Over 6.5%
ROE	10.2% (target: 8-10%)	Over 10%

Latest Outlook		
FY2025	FY2026	FY2030

2. Overview of Full-Year Financial Results for FY2024

Forecast for Full-Year FY2025

Full-year review (year-on-year comparison)

► Revenues: JPY2,588.7 billion (up JPY201.4 billion)

- Logistics — Revenue increased resulting from an increase in handling volumes. (up JPY109.8 billion)
- Automotive/Dry Bulk — Revenue increased due to the capturing of strong cargo demand and exchange rate effects. (up JPY75.3 billion)

► Recurring profit: JPY490.8 billion (up JPY229.5 billion)

- Liner Trade — Steady cargo volumes and the impact of the situation in the Red Sea on the supply and demand conditions continued, and freight rates exceeded those for the previous fiscal year (up JPY206.4 billion).

► Net income: JPY477.7 billion (up JPY249.1 billion)

► Shareholder returns:

Dividend (per share) Interim: 130 yen (paid) | **Year-end: 195 yen (planned) | Annual: 325 yen**

- The amounts have been determined in line with a targeted consolidated payout ratio of 30% as set forth in the basic shareholder return policy.
- The year-end dividend is planned to be set at **195 yen per share**, up 15 yen from the previous forecast.

Share repurchase

- The share repurchase at the total cost of JPY130.0 billion was completed on April 4, 2025, and all the shares repurchased will be retired on May 30, 2025.

Recurring profit by segment (year-on-year comparison)

► Liner Trade: JPY274.3 billion (up JPY206.4 billion)

- While shipping capacity following the delivery of new vessels continued to increase, steady cargo volumes and the impact of the situation in the Red Sea on supply and demand conditions continued, resulting in a YoY increase in freight rates.

► Air Cargo Transportation: JPY21.0 billion (up JPY15.3 billion)

- Shipment volumes from Asia to Europe and North America were firm, increasing handling volumes. Freight rates remained high due to the tightened supply and demand conditions.

► Logistics: JPY21.2 billion (down JPY4.6 billion)

- **Air freight & Ocean freight:** Air freight spot cargoes demand increased on top of strong cargo movements from Asia. The business experienced demand for bringing forward the ocean freight shipment caused by concerns over tariff hikes by the U.S., but profit level remained at the same level year on year due to an increase in purchase prices.
- **Contract logistics:** Due to the occurrence of one-off expenses related to growth investments implemented in the previous fiscal year, profit level decreased year on year.

Recurring profit by segment (year-on-year comparison)

► Automotive: JPY113.3 billion (up JPY7.5 billion)

- Despite the ongoing port congestion and route change caused by, among other factors, the conflict on the Middle East, the business captured robust transport demand by improving vessel utilization.

► Dry Bulk: JPY18.1 billion (up JPY0.0 billion, same level year on year)

- Although there are slight differences in market conditions for each vessel segment, full-year market conditions are generally at the same level year on year.

► Energy: JPY46.1 billion (down JPY0.2 billion)

- VLCC: Market levels declined, given the decrease in demand in China and other factors.
- VLGC: Market levels declined year on year due to an increase in shipping capacity resulting from the delivery of new vessels and the alleviation of the impact of the drought in the Panama Canal we experienced in the previous fiscal year.
- LNG carrier: The results were steady on support from medium- to long-term contracts.

Forecast for Full-Year FY2025

Forecast

Full-year forecast (year-on-year comparison)

- ▶ **Revenues: JPY2,380.0 billion (down JPY208.7 billion)**
 - Air Cargo Transportation: down JPY185.7 billion
- ▶ **Recurring profit: JPY255.0 billion (down JPY235.8 billion)**
 - Liner Trade: down JPY193.3 billion
- ▶ **Net income: JPY250.0 billion (down JPY227.7 billion)**
- ▶ **Shareholder returns:**

The forecasts do not take into account the impact of changes in external factors such as tariff measures in various countries and U.S. maritime policy.

The estimated impact of tariff measures on recurring income is shown below.

Down JPY0.0 billion - JPY100.0 billion

Dividend (per share) Interim: 115 yen (forecast) | Year-end: 120 yen (forecast) | (Annual: 235 yen)

- The amounts of forecast dividends are based on the number of shares before implementing the share repurchase as described below.
- As stated on page 6, the dividend policy will be changed as follows from FY2025:
 - Consolidated payout ratio: **40%** from 30%
 - Minimum dividend per share: **200 yen** from 100 yen

Share repurchase

- The share repurchase was implemented with the total amount of approximately JPY330.0 billion in FY2023 and FY2024. Based on the latest outlook for investment opportunities and the business environment, **a new share repurchase program has been decided** with the aim of further enhancing capital efficiency.

Total repurchase amount: **JPY150.0 billion (maximum)** (Repurchase period: May 9, 2025-April 30, 2026)

Forecast for Full-Year FY2025

Forecast

Recurring profit by segment (year-on-year comparison)

Estimated impact of tariffs, etc is shown below.

► Liner Trade: JPY81.0 billion (down JPY193.3 billion)

Down JPY0 billion - JPY45.0 billion

- Container Shipping: Rerouting via the Cape of Good Hope resulting from the situation in the Red Sea, is assumed to continue.
- The delivery of new vessels is expected to continue, and the supply-and-demand conditions are expected to soften.

► Air Cargo: Not included in forecast (down JPY21.0 billion)

- Not included in the full-year forecast as the share exchange of Nippon Cargo Airlines Co., Ltd. is to be executed on May 23, 2025, as announced in the timely disclosure dated April 25, 2025.

► Logistics: JPY18.0 billion (down JPY3.2 billion)

Down JPY0 billion - 5.0 billion

- Air freight & Ocean freight: Although the handling volumes were higher than in the same period last year, profit level is expected to decrease slightly year on year due to a decline in freight rates.
- Contract logistics: Although strong demand is expected mainly in North America and Southeast Asia, the incurrence of one-off expenses related to growth investments is expected to be continued in FY2024.

Forecast for Full-Year FY2025

Forecast

Recurring profit by segment (year-on-year comparison)

Estimated impact of tariffs, etc is shown below.

► Automotive: JPY96.0 billion (down JPY17.3 billion)

Down JPY0 billion - JPY20.0 billion

- Despite strong cargo demand, currently very tight demand for shipping capacity is expected to soften while the delivery of new vessels is expected to continue.

► Dry Bulk: JPY17.0 billion (down JPY1.1 billion)

Down JPY 0 billion - JPY20.0 billion

- The demand for shipping capacity environment has not changed significantly for all vessel segments. Market levels are expected to be almost as the same level as FY2024.

► Energy: JPY48.0 billion (up JPY1.9 billion)

Down JPY 0 billion - JPY10.0 billion

- VLCC: The delivery of new vessels is expected to be limited, and the market conditions are expected to be slightly stronger than the FY2024 level.
- VLGC: Despite steady production in North America and demand in the Far East, market levels are expected to fall short of the FY2024 level due to future uncertainties.
- LNG carrier: The business is expected to remain firm, backed by stable earnings from medium- to long-term contracts.

*1 Forecast as of FY2024 Q2 (November 6th, 2024). Forecast for Recurring Profit as of FY2024 Q3 (February 5th, 2025) is JPY 480Bn

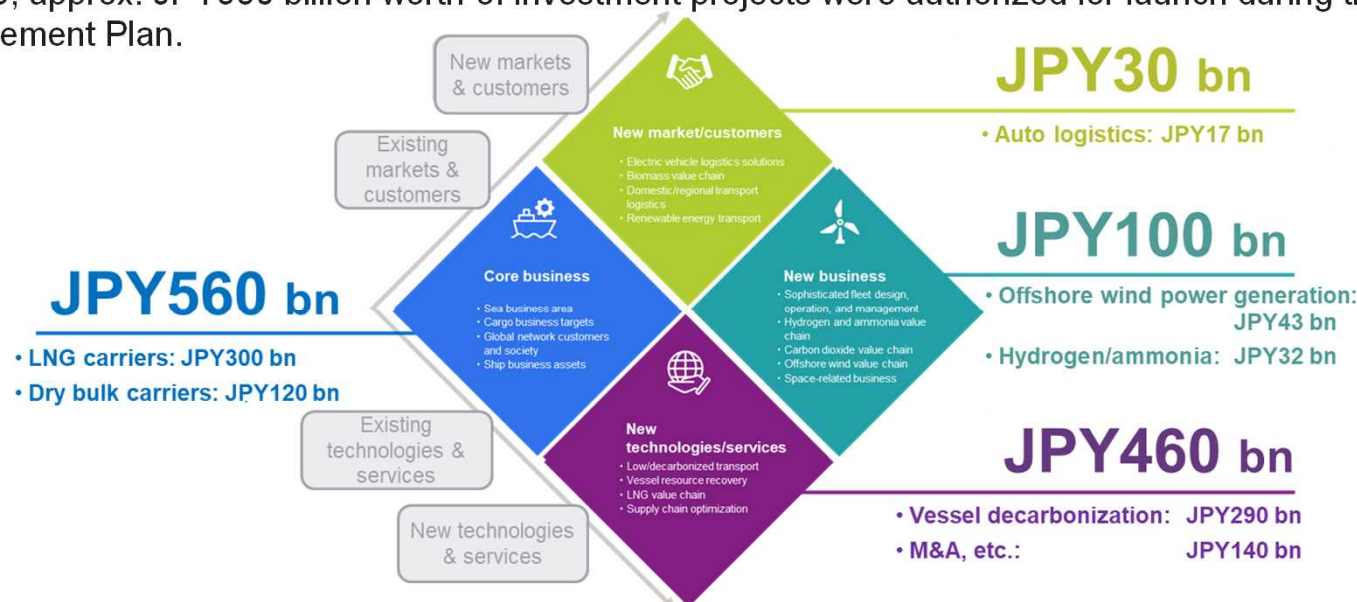

*2 Latest forecast (updated from forecast in the Medium-term management plan announced on March 10th, 2023)

*3 Our estimated Charter fee liabilities : Approx. JPY 700Bn are added to each fiscal year

*4 $ROIC = (\text{Operating income after tax} + \text{Extraordinary profit \& loss after tax} + \text{Equity in earnings of affiliates} + \text{Dividend income}) \div (\text{Invested capital})$

Business Investment Policy

- Increase the total amount of investments to be made until FY2026 to JPY1.4 trillion for investment targets, leading to stable shareholder return in the future.
- As of March 31, 2025, approx. JPY950 billion worth of investment projects were authorized for launch during the period of the Medium-term Management Plan.

	Investment Plan Initial Medium-term Management Plan	Progress	Latest Investment Plan	Major Investment Target
Core Business	JPY560 bn	90%	JPY800 bn	Expansion of LNG Carrier Fleet / Investment into NYK Energy Ocean* / Fleet Replacement
New technologies/services	JPY460 bn	80%	JPY450 bn	M&A by Yusen Logistics LNG-Fueled PCTC Fleet Expansion
New business	JPY100 bn	60%	JPY100 bn	Investment into CTV operator Development of Ammonia Fueled Vessel
New market/customers	JPY30 bn	120%	JPY50 bn	M&A in Auto-Logistics Business
Total	JPY1.2 tn		JPY1.4 tn	

*NYK Energy Ocean Corporation (NEO) : New company that will take over ENEOS Ocean's non-crude-oil shipping business.

Cash Allocation

- Formulate a strategic cash allocation plan to achieve both capital efficiency and sustainable growth.
- Reflect the current status of various cash flows, including dividend income from ONE in FY2025 (**including a special dividend from ONE of US\$2.0 billion in FY2025***). *ONE 100% base

* Investment includes the repayment of loans to Nippon Cargo Airlines (NCA).

Shareholder Return Policy

- Shareholder returns have been significantly expanded, driven by the stronger-than-expected operating results and cash flows. In FY2023 and FY2024, we increased the scale of share repurchase from the initial plan of JPY200.0 billion to JPY330.0 billion, while maintaining a dividend payout ratio of 30%.
- **From FY2025, we will raise the dividend payout ratio to 40%, and at the same time raise the minimum dividend per share to 200 yen.**
- To control equity capital with the aim of improving ROE, we **have set a maximum limit of JPY150.0 billion for share repurchase** through the end of April 2026. Going forward, we will continue to flexibly repurchase shares.

When formulating the medium-term management plan

Share repurchase

Repurchased share worth **JPY200.0 billion** to improve capital efficiency in FY2023 and FY2024.

Payout ratio

Raised the targeted payout ratio from the previous 25% to **30%**.

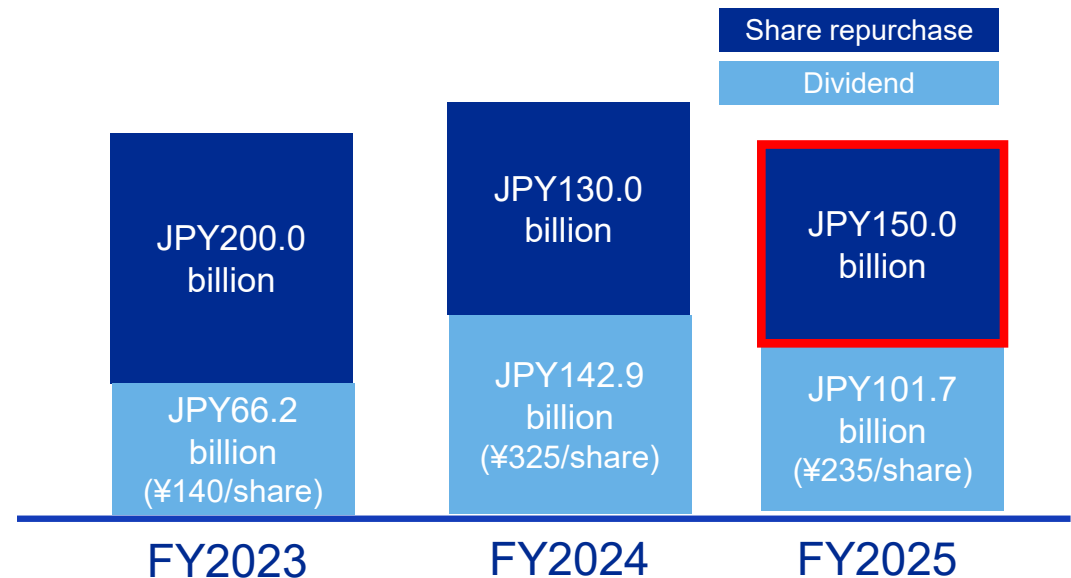

Additional return

Flexibly implemented additional returns, considering investment opportunities and business environment

Minimum dividend per share

Raised the minimum dividend per share to **100 yen**

Past returns and future policies

	FY2023	FY2024	FY2025
Dividend payout ratio	30%	30%	40%
Min. dividend per share	¥100	¥100	¥200
Total payout ratio (incl. buyback)	116%	56%	100%

Financial Results for FY2024

April 30, 2025

1.	FY2024 Full Year Results	P.3
2.	Liftings, Utilization, and Freight Index in Major Trades	P.4
3.	FY2025 Full Year Forecast	P.5
4.	ONE's Response to Recent Changes in the Business Environment	P.6
5.	Reference (Fleet Structure, Service Structure & New Order)	P.7
6.	Appendix: Change of Demand and Freight Index	P.8

1. FY2024 Results

□ Outline

Freight rates remained stable amid strong cargo demand. However, following the Lunar New Year, spot rates began to decline due to delayed demand recovery and vessel oversupply. For the full year, ONE's profit was US\$4,244 million, significantly improved from the last year.

- Extended rerouting of vessels round the Cape of Good Hope (CoGH) and port congestion absorbed surplus vessel capacity.
- Overall cargo movement remained stable. But since the Lunar New Year, weakness has been particularly noticeable on east-west routes, with recovery lagging.
- As a result, the freight rates have continued to trend downward since the Lunar New Year.

□ FY2024 results and PL analysis

(Unit: Million US\$)

	FY2023 (Results)							FY2024 (Results)							Year on Year	
	1Q Results	2Q Results	1H Results	3Q Results	4Q Results	2H Results	Full Year Results	1Q Results	2Q Results	1H Results	3Q Results	4Q Results	2H Results	Full Year Results	Change	Change (%)

Bunker consumption (K MT)	799	862	1,661	859	934	1,793	3,454	900	969	1,869	950	942	1,893	3,762	308	9%
Lifting (K TEU)	2,825	3,087	5,911	3,105	3,002	6,107	12,019	3,142	3,291	6,433	3,246	3,071	6,317	12,750	731	6%

FY2023 vs FY2024

- Lifting : Increased with stable cargo movement
- Operating Cost : Increased ship costs and bunker consumption due to ships routing via the CoGH
- Freight : Improved mainly in east-west bound trades
- Variable Cost : Increased due to higher container handling costs
- Bunker Price : Decreased Year on Year
- Overhead Cost : Increased Year on Year

2. Liftings, Utilization and Freight Index in Major Trades

Liftings / Utilization by Trades		FY2023							FY2024						
		1Q Results	2Q Results	1H Results	3Q Results	4Q Results	2H Results	Full Year Results	1Q Results	2Q Results	1H Results	3Q Results	4Q Results	2H Results	Full Year Results
Asia - North America Eastbound	Lifting (1,000TEU)	578	706	1,284	653	616	1,269	2,553	673	730	1,403	713	633	1,345	2,748

Asia - Europe Westbound	Lifting (1,000TEU)	385	434	819	382	382	764	1,584	434	451	886	418	426	845	1,730
	Utilization	94%	92%	93%	90%	93%	91%	92%	100%	97%	98%	93%	90%	92%	95%

Asia-North America Westbound	Lifting (1,000TEU)	291	295	586	327	295	621	1,208	290	281	571	271	254	525	1,096
	Utilization	44%	40%	42%	46%	49%	48%	45%	43%	39%	41%	40%	37%	38%	40%
Asia-Europe Eastbound	Lifting (1,000TEU)	240	221	461	232	238	470	931	245	244	490	237	249	487	976
	Utilization	54%	45%	49%	50%	55%	52%	51%	48%	45%	46%	47%	44%	46%	46%

(Unit: 100 = average freight rates as of 1Q FY2018)

Freight Index by Trades		FY2023							FY2024						
		1Q Results	2Q Results	1H Results	3Q Results	4Q Results	2H Results	Full Year Results	1Q Results	2Q Results	1H Results	3Q Results	4Q Results	2H Results	Full Year Results
Asia - North America Eastbound		126	109	117	108	135	121	119	137	195	167	159	146	153	160
Asia - Europe Westbound		139	116	127	106	183	144	135	201	293	248	218	204	211	230

- Liftings, Utilization: In the North America eastbound trade, high utilization was maintained up to the Lunar New Year due to strong cargo demand. However, recovery post Lunar New Year has been subdued due to various reasons including a slowdown in cargo movement. In the Asia-Europe westbound trade, a similar trend was observed, where utilization also dropped after the Lunar New Year due to weakening demand.
- Freight Index: Spot freight rates in the 4th quarter decreased in both the North America eastbound trade and the Asia-Europe westbound trade from the 3rd quarter, but remained above the levels in the same quarter of the last year.

3. FY2025 Full Year Forecast

□ Outline

- Considering the prevailing geopolitical landscape and the significant economic instability introduced by recent tariff developments in April, forecasting a precise full-year profit figure for FY2025 presents considerable challenges.
- In this context, our baseline FY2025 full-year profit after tax forecast stands at approximately US\$1,100 million, predicated on an assumption of a relatively stable business environment throughout the fiscal year(Case 1).
- However, recognizing the heightened uncertainty, we have also conducted comprehensive sensitivity analyses. These analyses consider potential headwinds such as weakened cargo volumes in specific trade lanes and reductions in freight rates across global markets. The outcomes of these scenarios indicate a potential profit after tax in the range of approximately US\$250 million(Case 2).
- To proactively address these potential challenges and bolster the resilience of our operations, we have formed a dedicated task force comprising representatives from our global headquarters. This team will closely monitor evolving economic conditions and ensure the timely communication of critical updates.

□ FY2025 Full Year Forecast

(Unit: Million US\$)

Case 1	FY2025 (Forecast)		
	1H	2H	Full Year
Revenue	9,000	8,500	17,500
EBITDA	1,600	1,300	2,900
EBIT	500	200	700
Profit/Loss	750	350	1,100

(Unit: Million US\$)

Case 2	FY2025 (Forecast)		
	1H	2H	Full Year
Revenue	8,500	8,000	16,500
EBITDA	1,200	900	2,100
EBIT	100	-200	-100
Profit/Loss	350	-100	250

4. ONE's Response to Recent Changes in the Business Environment

Events

- Cargo movements from Asia to North America in January and February increased by 13.4% year-on-year, driven by robust demand. This surge appears to reflect strong U.S. consumer spending and front loading in anticipation of tariff hikes. Following the Lunar New Year, there was a tendency to hold off on shipments due to uncertainty about the outlook.
- Cargo movements from Asia to Europe increased by 20.2% year-on-year in January. Similar to the Asia-North America route, demand has weakened since the Lunar New Year, with recovery remaining sluggish.
- While the peak of new vessel deliveries has passed, continued rerouting of vessels round the CoGH led to tight supply demand through the first half of 4Q. However, since the Lunar New Year, weakening cargo demand has led to vessel oversupply.
- Rerouting vessels round the CoGH persists due to the unstable geopolitical situation.
- Many ports across North America, Europe, and Asia suffered from severe congestion, due to factors such as bad weather conditions, strikes, and labor shortages.

ONE's response

- Maintained counter measures to minimize supply chain disruptions caused by the situation in the Red Sea/Gulf of Aden.
- Continuous review of cargo portfolio to enhance yield management and maximize profitability.
- Minimized the impact on customers' supply chains during the alliance reshuffling by ensuring a smooth transition to "Premier Alliance".
- Implemented flexible measures to minimize supply chain disruptions caused by port congestion in various regions.

Maximize operational efficiency through flexible vessel deployment and optimization of container flow
